

***STEM Spotlights: Bits & Bytes – March 27, 2020***

**Looking for some fun STEM Activities to do at home with your family?**

The activities from this STEM Menu integrate Writing, Reading, Math, Science, and Geography! They are interdisciplinary and help students make connections between STEM subjects as well as writing and reading! To complete these STEM menus, you will need common household items like paper and tape, then from there, the sky is the limit!

**We want to see your creations & innovations!**

Head to <https://flipgrid.com/cb5f9faa> and sign in with your **student** Office365 account to record a 2 minute video to Show & Tell your solutions, catapults, blueprints, and bridges!

**How many activities can YOU complete this week? [STEM at Home Week #1](#)**
