

## Day 2, Task 1

Choose a simple shape to draw (circle, heart, star).

Set a timer and draw as many circles as you can for each of the times below.

30 seconds

one minute

two minutes

four minutes

What do you notice? What surprises you?

## Day 2, Task 2

- Consider the kinds of noises you might expect to hear outside of your home.
- Find a comfortable place to sit outside (or near an open window).
- Set a timer for 3 minutes and keep a running tally of each sound you hear while the timer is running. Which sound do you predict you will hear most often?

Capture your data here:

Animals	
Vehicles	
Airplanes	
Environmental (wind, trees)	
Music	
Voices	

- Consider how you might visually represent your data using a variety of lines, shapes, and colors.
- Create a visual of your soundscape and include a key or a legend so that someone else can interpret your data.
