

Steps To Connect At-Home Wi-Fi

In order to connect to your home Wi-Fi, you need to ensure your VPN is on.

This may need to be repeated frequently, when connecting and using at home Wi-Fi.

1. Turn iPad off for at least 30 seconds
 - a. You can do this by holding down the back button and waiting until the following screen appears

----->

2. Turn iPad back on
 - a. You can do this by holding the same back button you used to turn your iPad off

3. Open your Settings app

4. On the left side, you will see VPN as the fourth option down. Your VPN MUST be green. Slide or click the toggle to the right, if it is not green.

5. Click on Wi-Fi and select your home Wi-Fi
