CARLSTADT-EAST RUTHERFORD REGIONAL HIGH SCHOOL DISTRICT
MATHEMATICS DEPARTMENT
GEOMETRY / GEOMETRY CP/ GEOMETRY HONORS

Geometry / Geometry CP / Geometry Honors Curriculum Guide

| Pacing Guide | Unit 1 (Chapter 1): Basics of Geometry. 2-3 weeks |
| :--- | :--- |
| Geometry is a full year course <br> that meets on a rotating basis for <br> three (3) 55-minute blocks and <br> one (1) 40-minute block for <br> every five (5) day cycle. | Unit 2 (Chapter 2): Reasoning and Proof. 1-2 weeks 3 (Chapter 3): Perpendicular and Parallel Lines. 2-3 weeks |
|  | Unit 4 (Chapter 4): Congruent Triangles. Regular: 4-5 weeks |
|  | Unit 5 (Chapter 5): Properties of Triangles. 2 weeks |
|  | Unit 6 (Chapter 8): Similarity. 2-3 weeks |
|  | Unit 7 (Chapter 9): Right Triangles and Trigonometry. 3-4 weeks |
|  | Unit 8 (Chapter 6): Quadrilaterals. 2-3 weeks |
|  | Unit 9 (Chapter 7): Transformations. 2-3 weeks |
|  | Unit 10 (Chapter 10): Circles. 3-4 weeks |
|  | Unit 12 (Chapter 12): Surface Area and Volume. 2-3 weeks |
|  |  |

## CARLSTADT-EAST RUTHERFORD REGIONAL HIGH SCHOOL DISTRICT <br> MATHEMATICS DEPARTMENT <br> GEOMETRY / GEOMETRY CP/ GEOMETRY HONORS

| 21 ${ }^{\text {st }}$ Century Skills Standards: <br> 9.2 Career Awareness | 9.2.12.C.1: Review career goals and determine steps necessary for attainment. |
| :---: | :---: |
| Technology Standards | 8.1.12.A.4: Construct a spreadsheet, enter data, and use mathematical or logical functions to manipulate data, generate charts and graphs, and interpret the results. <br> 8.1.12.A.CS1: Understand and use technology systems. |
| Interdisciplinary Connections | SCIENCE <br> HS-PS1-1. Use the periodic table as a model to predict the relative properties of elements based on the patterns of electrons in the outermost energy level of atoms. |
| NJSLS Mathematical Practices These practices are demonstrated throughout the curriculum. | 1. Make sense of problems and persevere in solving them. <br> 2. Reason abstractly and quantitatively. <br> 3. Construct viable arguments and critique the reasoning of others. <br> 4. Model with mathematics. <br> 5. Use appropriate tools strategically. <br> 6. Attend to precision. <br> 7. Look for and make use of structure. <br> 8. Look for and express regularity in repeated reasoning. |
| NJSLS Career Ready Practices These practices are demonstrated throughout the curriculum | CRP2. Apply appropriate academic and technical skills. CRP4. Communicate clearly and effectively and with reason. <br> CRP6. Demonstrate creativity and innovation. <br> CRP7. Employ valid and reliable research strategies. <br> CRP8. Utilize critical thinking to make sense of problems and persevere in solving them. CRP9. Model integrity, ethical leadership and effective management. <br> CRP11. Use technology to enhance productivity. <br> CRP12. Work productively in teams while using cultural global competence. |

## CARLSTADT-EAST RUTHERFORD REGIONAL HIGH SCHOOL DISTRICT <br> MATHEMATICS DEPARTMENT <br> GEOMETRY / GEOMETRY CP/ GEOMETRY HONORS

Differentiation/Accommodations/Modifications
Note: Each district should review the various strategies noted below and determine which are applicable for their population within varied grade levels and languages and make edits where needed.

| Gifted and Talented | English Language Learners | Students with Disabilities | Students at Risk of School Failure |
| :---: | :---: | :---: | :---: |
| (content, process, product and learning environment) <br> Extension Activities: <br> - Conduct research and provide presentation of mathematical topics. <br> - Design surveys to generate and analyze data to be used in discussion. <br> - Use of higher level questioning techniques. <br> - Provide assessments at a higher level of thinking. | Modifications for Classroom: <br> Modifications for Homework/Assignments <br> - Modified assignments. <br> - Extended time for assignment completion as needed. <br> - Use graphing calculator. <br> - Highlight formulas. | (appropriate accommodations, instructional adaptations, and/or modifications as determined by the IEP or 504 team) <br> Modifications for Classroom: <br> - Ask students to restate information, directions, and assignments. <br> - Repetition and practice. <br> - Model skills / techniques to be mastered. <br> - Extended time to complete class work. <br> - Provide copy of classnotes. <br> - Preferential seating to be mutually determined by the student and teacher. <br> - Students may request books online, on tape/CD, as available and appropriate. <br> - Assign peer helper in the class setting. <br> - Provide regular parent / school communication <br> - Provide oral reminders and check student work during independent | Modifications for Classroom: <br> - Ask students to restate information, directions, and assignments. <br> - Repetition and practice. <br> - Model skills / techniques to be mastered. <br> - Extended time to complete class work. <br> - Provide copy of classnotes. <br> - Preferential seating to be mutually determined by the student and teacher. <br> - Students may request books online, on tape/CD, as available and appropriate. <br> - Assign peer helper in the class setting. <br> - Provide oral reminders and check student work during independent work time. <br> - Assist student with long and short term planning of assignments <br> - Provide regular parent / school communication. <br> - Assign peer helper in the class setting. |

## CARLSTADT-EAST RUTHERFORD REGIONAL HIGH SCHOOL DISTRICT <br> MATHEMATICS DEPARTMENT <br> GEOMETRY / GEOMETRY CP/ GEOMETRY HONORS

|  |  | work time. <br> - Assist student with long and short term planning of assignments <br> Modifications for Homework <br> - Extended time to complete assignments. <br> - Student requires more complex assignments to be broken up and explained in smaller units, with work to be submitted in phases. <br> - Provide the student with clearly stated (written) expectations and grading criteria for assignments. <br> Modification for Assessments <br> - Extended time on classroom tests and quizzes. <br> - Student may take / complete tests in an alternate setting as needed. <br> - Restate, reread, and clarify directions/questions. <br> - Distribute study guide for classroom tests. <br> - Establish procedures for accommodations / modifications for assessments. | - Provide oral reminders and check student work during independent work time. <br> - Assist student with long and short term planning of assignments <br> Modifications for Homework <br> - Extended time to complete assignments. <br> - Student requires more complex assignments to be broken up and explained in smaller units, with work to be submitted in phases. <br> - Provide the student with clearly stated (written) expectations and grading criteria for assignments. <br> Modification for Assessments <br> - Extended time on classroom tests and quizzes. <br> - Student may take / complete tests in an alternate setting as needed. <br> - Restate, reread, and clarify directions/questions. <br> - Distribute study guide for classroom tests. <br> - Establish procedures for accommodations / modifications for assessments. |

## CARLSTADT-EAST RUTHERFORD REGIONAL HIGH SCHOOL DISTRICT <br> MATHEMATICS DEPARTMENT <br> GEOMETRY / GEOMETRY CP/ GEOMETRY HONORS

## CONTENT: Chapter 1

## Theme: Basics of Geometry

## Essential Questions:

How do you use inductive reasoning in mathematics?
How do you name geometric figures?
What are congruent segments?
How do you identify whether an angle is acute, right, obtuse, or straight?
How do you identify complementary and supplementary angles?

| Content (As a result of this learning segment, students will know...) <br> - Section 1.1 Patterns and Inductive | Skills (As a result of this learning segment, students will be able to...) <br> - Find and describe patterns | Assessments (The above Essential Questions will be assessed with the following formative and summative measures:) |
| :---: | :---: | :---: |

- Use inductive reasoning to make real-life conjecture
- Homework

| Standards: |
| :--- |
| TECH 8.1.12.A.CS1, 8.1.12.A.4 |
| NJSLS MA 9-12 |
| G.CO.9, 10, 11 |

## Essential Questions:

What angle pairs are formed by transversals?
How are corresponding angles and alternate interior angles related for two parallel lines and a transversal?
How do you find the slope of a line given the coordinates of two points on the line?
How do you write an equation of a line?
How do you find the distance between a point and a line?

Content (As a result of this learning segment, students will know...)

- Section 3.2 Proof and Perpendicular Lines

Skills (As a result of this learning segment, students will be able to...)

- Write different types of proofs
- Prove results about perpendicular lines

## Assessments (The above Essential

 Questions will be assessed with the following formative and summative measures:)- Homework
- Warm up exercises
- Exit Tickets
- Group activities
- Section quizzes
- Chapter tests
- Cumulative tests
- Projects / Presentations
- Midterm exam
- Final Exam

## Standards:

TECH 8.1.12.A.CS1, 8.1.12.A. 4

## Materials:

Textbook: 2004 McDougal Littell Geometry by Larson, ISBN: 0-618-25023-9

Graphing calculators: Ti-83/84 plus.
Smart board, internet research and activities, graph papers, color pencils.

Geometer's Sketchpad

## CARLSTADT-EAST RUTHERFORD REGIONAL HIGH SCHOOL DISTRICT <br> MATHEMATICS DEPARTMENT <br> GEOMETRY / GEOMETRY CP/ GEOMETRY HONORS

## CONTENT: Chapter 5

Theme: Properties of Triangles

## Essential Questions:

How do you find the point of concurrency of the perpendicular bisectors of the sides of a triangle?
How do you find the centroid of a triangle?
How do you write a coordinate proof?
How do you find the possible lengths of the third side of a triangle if you know the lengths of two sides?
What is the first step in writing an indirect proof?

Content (As a result of this learning segment, students will know...)

- Section 5.6 Indirect Proof and Inequalities in Two Triangles

Skills (As a result of this learning segment, students will be able to...)

- Read and write an indirect proof
- Use the Hinge Theorem and its converse to compare side lengths and angle measures.

## Assessments (The above Essential Questions will be assessed with the following formative and summative measures:)

- Homework
- Warm up exercises
- Exit Tickets
- Group activities
- Section quizzes
- Chapter tests
- Cumulative tests
- Projects / Presentations
- Midterm exam
- Final Exam

## CARLSTADT-EAST RUTHERFORD REGIONAL HIGH SCHOOL DISTRICT <br> MATHEMATICS DEPARTMENT <br> GEOMETRY / GEOMETRY CP/ GEOMETRY HONORS

## CONTENT: Chapter 8

## Theme: Similarity

## Essential Questions:

If two figures are similar, how do you find the length of a missing side?
How can you show that two triangles are similar?
How do you prove that two triangles are similar by using the SSS Similarity Theorem?
What proportions can you write if a line is parallel to one side of a triangle?
How do you dilate a figure in the coordinate plane?

Content (As a result of this learning segment, students will know...)

- Section 8.1 Ratio and Proportion

Skills (As a result of this learning segment, students will be able to...)

- Read and write an indirect proof
- Use the Hinge Theorem and its converse to compare side lengths and angle measures.

## Assessments (The above Essential Questions will be assessed with the following formative and summative measures:)

- Homework
- Warm up exercises
- Exit Tickets
- Group activities
- Section quizzes
- Chapter tests

## CARLSTADT-EAST RUTHERFORD REGIONAL HIGH SCHOOL DISTRICT MATHEMATICS DEPARTMENT <br> GEOMETRY / GEOMETRY CP/ GEOMETRY HONORS

## CONTENT: Chapter 9

## Theme: Right Triangles and Trigonometry

## Essential Questions:

How can you find the length of the altitude to the hypotenuse of a right triangle?
If you know the lengths of two sides of a right triangle, how do you find the length of the third side?
How can you use the sides of a triangle to determine if it is right?
How do you find the lengths of the sides of a $30^{\circ}, 60^{\circ}, 90^{\circ}$ triangle and a $45^{\circ}, 45^{\circ}, 90^{\circ}$ triangle?
How can you find the leg of a right triangle when you know the other leg and one acute angle?
How can you find the lengths of the sides of a right triangle when you are given the length of the hypotenuse and once acute angle?
In a right triangle, how can you find all the sides and angles of the triangle?
How do you find the area of a regular polygon?

Content (As a result of this learning $\quad$ Skills (As a result of this learning segment, students will know...)

- Section 9.2 The Pythagorean Theorem
segment, students will be able to ...)
- Prove the Pythagorean Theorem
- Use the Pythagorean Theorem to solve real-life problems

## CARLSTADT-EAST RUTHERFORD REGIONAL HIGH SCHOOL DISTRICT <br> MATHEMATICS DEPARTMENT <br> GEOMETRY / GEOMETRY CP/ GEOMETRY HONORS

## CONTENT: Chapter 7

Theme: Transformations

## Essential Questions:

How do you translate a figure in the coordinate plane?
When does a figure have line symmetry?
How do you reflect a figure in the coordinate plane?
How do you rotate a figure about the origin?
When does a figure have rotational symmetry
What is a glide reflection?

Content (As a result of this learning segment, students will know...)

- Section 7.1 Rigid Motion in a Plane

Skills (As a result of this learning segment, students will be able to...)

- Identify the three basic rigid transformations
- Use transformations in real-life situations

Assessments (The above Essential Questions will be assessed with the following formative and summative measures:)

- Homework
- Warm up exercises
- Exit Tickets
- Group activities
- Section quizzes
- Chapter tests
- Cumulative tests
- Projects / Presentations
- Midterm exam
- Final Exam

Content (As a result of this learning segment, students will know...)

- Section 11.5 Areas of Circles and Sectors

Skills (As a result of this learning segment, students will be able to...)

- Find the area of a circle and a sector of a circle
- Use areas of circles and sectors to solve real-life problems

Assessments (The above Essential Questions will be assessed with the following formative and summative measures:)

- Homework
- Warm up exercises
- Exit Tickets
- Group activities
- Section quizzes
- Chapter tests
- Cumulative tests
- Projects / Presentations
- Midterm exam
- Final Exam

## Standards:

TECH 8.1.12.A.CS1, 8.1.12.A. 4
NJSLS MA 9-12
G.C. 5

Time Frame:
2-3 days

## Materials:

Textbook: 2004 McDougal Littell
Geometry by Larson, ISBN: 0-618-25023-9

Graphing calculators: Ti-83/84 plus.
Smart board, internet research and activities, graph papers, color pencils.

Geometer's Sketchpad

## CARLSTADT-EAST RUTHERFORD REGIONAL HIGH SCHOOL DISTRICT <br> MATHEMATICS DEPARTMENT <br> GEOMETRY / GEOMETRY CP/ GEOMETRY HONORS

## CONTENT: Chapter 12

Theme: Surface Area and Volume

## Essential Questions:

What is a solid a polyhedron?
What is the surface area of prisms, cylinders, pyramids, cones and spheres?
What is the volume of prisms, cylinders, pyramids, cones and spheres?
If two solids are similar, what is the ratio of their surface area and what is the ratio of their volumes?

Content (As a result of this learning segment, students will know...)

- Section 12.1 Explore Solids

Skills (As a result of this learning segment, students will be able to...)

- Use properties of polyhedral
- Use Euler's Theorem in real-life situation

Assessments (The above Essential Questions will be assessed with the following formative and summative measures:)

- Homework
- Warm up exercises
- Exit Tickets
- Group activities
- Section quizzes
- Chapter tests
- Cumulative tests
- Projects / Presentations
- Midterm exam
- Final Exam
