The Easy Way to Join a Zoom Event

For a computer

When someone invites you to a **Zoom call**, they will send you a link that looks like <https://zoom.us/j/1010101010> (not a valid link – for illustration purposes only).

Even if you haven't downloaded Zoom to your computer, when you click on the link, Zoom will automatically download and connect you to the call.

When the video screen first opens, you will get a dialogue box that asks you to choose **Join Audio by Computer**. Just click the button.

In the lower left corner of the screen you will find a microphone icon and a video camera icon. You can use the microphone icon to mute your audio or turn it on.

For a smartphone or tablet

You will need to install Zoom manually. Go to iOS App Store or Google Play and look for Zoom Cloud Meetings. Download and follow the directions.

Setting up a free account

You can be a **guest on a call without any account** but know that you need an account to host a call. You can sign up for a free account at <https://zoom.us/signup>.
