ACADEMY OF MEDIA ARTS

Courses in the Digital Photography Pathway

Art of Digital Photography (UC-F)
Digital Photography II (UC-G)
Yearbook / Digital Media (UC-F)
Professional Internship

Art of Digital Photography is articulated with Santa Ana College and Coastline Community College!

Become a skilled photographer learning how to take better pictures and how to edit in Photoshop. Studio and location shooting, as well as advanced lighting and printing are explored. Portfolio building will be a focus.

As companies continue to increase their digital presence, more art and design workers will be needed to help create visually appealing and layouts of platforms.

Photographers use their technical expertise, creativity, and composition skills to produce and preserve images that tell a story or record an event. Knowledge of Adobe's Photoshop allows for cropping, color adjustments, and special effects.
