Asthma Management

Identification of Students with Asthma

The Superintendent or designee shall, upon a student's registration for school and annually thereafter, request parents/guardians to notify the principal or designee, in writing, if their child has been diagnosed with asthma, has recently experienced symptoms or has a history of asthma, and/or is at risk for potentially severe asthma attacks. The request also shall encourage parents/guardians to provide such notification at any time during the school year that their child is so diagnosed.

The Superintendent or designee shall keep a student's medical information in a secure location and maintain the confidentiality of student health records in accordance with law governing student records. In addition, pertinent information from the health record shall be released to other employees whose responsibilities require that they have access to such information in order to provide support services or to respond in an emergency, such as a student's teacher(s), coach(es), bus driver, and any other staff with responsibility for direct supervision of the student.

Individualized Asthma Management

When a student has been diagnosed with asthma or when such a student registers for school, the Superintendent or designee shall request that the parent/guardian submit an asthma information form from which the school nurse will develop an individual care plan if needed. In severe cases the care plan shall be developed by the student's health care provider, in partnership with the student and his/her parents/guardians, and shall include, but not be limited to, information regarding the student's symptoms and severity, asthma triggers, necessary medications, and the parent/guardian's authorization for the health care provider's disclosure of health information to the district. The Superintendent or designee shall request that the parents/guardians submit an updated plan each school year or whenever there are changes in the student's health condition or treatment.

Students shall be encouraged to notify their teacher, physical education teacher, coach, or other staff when they are experiencing difficulty breathing and/or need to alter their physical activity level. The student shall be supervised on school grounds by a responsible adult until he/she is no longer experiencing symptoms and/or his/her parent/guardian has been contacted.

Students

Asthma Management (continued)

In case of emergency, staff shall call 911 and assist the student in the administration of quick relief medication as authorized in the student's asthma individual health care plan. Staff shall contact the student's parent/guardian or other person identified as an emergency contact and shall supervise the student until his/her care has been assumed by a health professional, parent/guardian, or designated emergency contact.

Education and Support Services

Asthma management and support systems shall be coordinated by a school nurse.

The Superintendent or designee shall provide each school site with information regarding emergency management of asthma to post in easily accessible locations.
