

With all that is
happening in the
world, nurses and
doctors are doing
their best to support
us despite the long
hours and sometimes
dangerous conditions

Now it's
our turn
to help
out

It can be challenging
to interact with
people who are
unwell or not in the
best place in their life

You can't
always prevent
bad things from
happening

The hours are
long

The job is
physically
demanding, it
can take a toll on
your body

But there
are even
more
rewards
from
working as
a nurse

You get to witness
miracles

You get to
educate
people

While still
learning new
things

There is never a dull day

When your surround by
people who support you

Please
stay safe
and
healthy

Thank you
