Description: Summer Work General \$53,000.00

Notes: This line item in this account is used to fund summer curriculum work, our Credit Enhancement program, and a math intervention program. This summer in addition to continuing to work to align the curriculum with the SAT, and conducting analyzes of student assessment results on the SAT, PSAT, NGSS and physical fitness test results, with a new 8 period schedule being implemented next year, department chairs will be working with teachers in their departments to develop new courses to offer students in the expanded schedule.

The funds in this line item will also be used to fund the high school Credit Enhancement Program and will comprise 8,000 of the total funds allotted for this account for 66 hours of contact time with students. As in past summers we will be offering two courses so that students are able to acquire up to 1 high school credit. This may be the last year that we will need to run this program because the new high school schedule will allow students who struggle and fail classes to make up the credit during the course of the regular school year. It is important to note that even last year in which there was a large increase the amount of money added to this line item that there was not enough money in the account to fund these programs. We will also use the funds in this program to fund a Math Intervention Program for students transitioning into 9th grade which may be expanded to provide math intervention to students who historically struggle with mathematics in high school. The Math Department of the high school and middle school will use SBAC scores and student achievement results in mathematics to identify students with significant skill gaps that need remediation in mathematics.

Description: TEACHER SUBSTITUTES		\$150,000.00				
Notes: These funds are used to pay for substitutes for teachers who are absent from class. Historically the funds that are requested are insufficient to cover the amount of money needed to cover the cost of funding this account. Additionally, we do not have a dedicated staff member or permanent substitute to staff the ISS room, which we need to reduce the number of days that students are placed on external suspension. The funds are used to cover the cost of substitute teacher supervising students placed in ISS.

Description: MISC PUR SERV-GENERAL		\$18,000.00				
Notes: The funds in this account are used to support special programs for high school students such as mindfulness training, safe driving, character and leadership development and the dangers of alcohol and drug use. The funds from this account are also used to pay for the subscription to PowerSchool Learning. We also use the monies in this account to fund the administration of the PSAT to our 9th, 10th and 11th grade students. Data from these assessments enables us to determine if our students are on track to attain a benchmark score on the SAT by the second semester of their Junior year. This assessment data provides the data required to plan curriculum changes to make school improvement plans. The cost of doing this is approximately \$8,000. The funds in this account are also used to fund Newslea.

	Notes: Our specialty equipment needs to be repaired and maintained by professional companies. This cost is extensive for both labor and equipment. Costs continue to increase! At this time we were hoping to have four working kilns. Our newer Cone Art kiln was installed two years ago in the ceramics storage room. And the ventilation is up to fire codes. Two years ago we were told by Sheffield pottery to never again use the Skutt kiln. The electrical became unsafe. We still need repair funds for the L&L kilns or funds to replace the Skutt kiln. Three kilns are not sufficient during the end of the semester because of the increased interest and enrollment in Ceramics.

Description: Consumable items

\$1,867.00

Notes: With a recent shift to NGSS, new equipment is necessary to cover standards not previously taught. This requires a shift in topics as well as methods of instruction for both 7th and 8th grade. Consumables are a necessary part of students designing and building as part of the engineering process, a key component of NGSS. The 7th and 8th grade curriculum is very lab centered and hands on. This section of our budget accommodates the lab and activities necessary to deliver the curriculum. These items include grocery store items, items from science catalogs, software, Lowes, Home Depot, PETCO, Staples, etc for items needed throughout the school year for the consumable items used in lab activities which are at the core of our program. Examples include batteries, motors, chemicals, balsa, etc.

Description: General materials

\$2,081.00

Notes: This account is split between 4 middle school science teachers for purchasing of classroom equipment, teaching posters and models, and safety equipment (aprons, goggles, etc.). With the recent shift in standards to NGSS, it will be necessary to provide supplies for new units of study as well as new approaches (engineering practices, modeling, etc.)

Description: Pasco Sensors

\$1,140.00

Notes: Students have begun using PASCO Passport Sensors which connect to data loggers for instant data collection and analysis. Additional sensors and USB interfaces are needed to continue to make progress in this STEM area. Additional purchases of motion tracks and dynamic carts will allow smaller groups to participate in motion studies. As we continue our transition to NGSS, the sensor technology allows us to provide more STEM based activities.

Description: Science Supply Room Needs

\$1,533.00

Notes: To stock science supply room with non-consumable equipment to allow the department to continue developing and delivering a hands-on, inquiry based program. Items include anatomical models, materials for friction studies, states of matter demonstration tools, simple machine manipulatives, and trade books. Additionally, the shift to NGSS will require the department to update equipment to address these new standards,

The Special Education Department is required to constantly update and subscribe to on-line reading and writing programs which are extremely expensive. Due to increase in students identified as Dyslexic, programs such as Read Naturally, Co-Writer, Learning Ally, IXL, Lexia, Google Read and Write are crucial to leveling the playing field for our handicapped students. These on-line programs are very expensive and along with our consumable books, updating our texts to accommodate the demands of the common core access to funding is critical to this department.

The purchase of programs such as Learning Ally, Megawords, Read Naturally, Lexia, BrainPOP, Co-Writer and Google Read and Write to name only a few are necessary to help our students keep pace and access the curriculum. Notes: Our specialty equipment needs to be repaired and maintained by professional companies. This cost is extensive for both labor and equipment. Costs continue to increase! At this time we were hoping to have four working kilns. Our newer Cone Art kiln was installed two years ago in the ceramics storage room. And the ventilation is up to fire codes. Two years ago we were told by Sheffield pottery to never again use the Skutt kiln. The electrical became unsafe. We still need repair funds for the L&L kilns or funds to replace the Skutt kiln. Three kilns are not efficient during the end of the semester because of the increased enrollment in Ceramics.
