Adding & Subtracting Fractions

1. Rename the fractions to equivalent fractions with common denominators
2. Add or subtract the numerators and keep the denominator the same
3. If mixed numbers, add or subtract the whole numbers
4. If possible, simplify the answer & change improper fractions to mixed numbers

ex: $4\frac{4}{9} + \frac{2}{3}$

$$\begin{array}{r} 4\frac{4}{9} \quad \begin{array}{l} \times 1 \\ \times 1 \end{array} = \frac{4}{9} \\ + \quad \frac{2}{3} \quad \begin{array}{l} \times 3 \\ \times 3 \end{array} = \frac{6}{9} \\ \hline \end{array}$$

$$4 \frac{10}{9} = \boxed{5 \frac{1}{9}}$$

Multiplying Fractions

1. Turn a whole number into a fraction by giving it a denominator of 1
2. Cross-simplify the fractions if possible
3. Multiply the 2 numerators and the 2 denominators
4. If possible, simplify the answer & change improper fractions to mixed numbers

ex: $6 \times \frac{2}{3}$

$$\begin{array}{r} 2 \cancel{6} \times \frac{2}{\cancel{3}} = \frac{4}{1} \\ \frac{1}{1} \times \frac{2}{3} \end{array}$$

$$= \boxed{4}$$

Dividing Fractions

1. Turn a whole number into a fraction by giving it a denominator of 1
2. Keep the 1st fraction the same, change the division symbol to multiplication, and flip the 2nd fraction to its reciprocal
3. Multiply the 2 fractions
4. If possible, simplify the answer & change improper fractions to mixed numbers

ex: $12 \div \frac{1}{2}$

$$\frac{12}{1} \div \frac{1}{2}$$

$$\frac{12}{1} \times \frac{2}{1} = \frac{24}{1} = \boxed{24}$$

Find each sum or difference. Show your work.

67. $\frac{7}{8} + \frac{5}{6}$

68. $\frac{9}{10} - \frac{1}{2}$

69. $\frac{3}{11} + \frac{2}{3}$

70. $\frac{11}{12} - \frac{13}{18}$

71. $4\frac{5}{9} + 7\frac{1}{3}$

72. $12\frac{9}{14} - 9\frac{3}{7}$

73. $3\frac{3}{5} + 2\frac{3}{4}$

74. $2\frac{2}{15} - 1\frac{2}{3}$

Find each product or quotient. Show your work.

75. $\frac{1}{6} \times \frac{3}{4}$

76. $6 \div \frac{1}{3}$

77. $15 \times \frac{2}{3}$

78. $\frac{1}{2} \div 3$

79. $\frac{1}{6} \times 10$

80. $\frac{1}{4} \div 2$

81. $\frac{5}{9} \times \frac{3}{20}$

82. $4 \div \frac{1}{5}$

Solve each problem, showing all work.

83. Jacqui ran $1\frac{1}{2}$ miles on Monday, Wednesday, and Friday and $\frac{3}{4}$ mile on Tuesday and Thursday. How far did she run in all?

84. Tyrell gave 3 packs of baseball cards to his friends. He gave each friend $\frac{1}{3}$ of a pack. How many friends got baseball cards?

Name _____

Read the passage. Use the ask and answer questions strategy to help you understand what you read.

Migration

13 You may know people who have moved from one city to another. When
27 people move, they usually stay in their new place for quite a while. Did
41 you know that there are many animals that move two times a year? This
regular movement is called migration.

46 A migration is usually a round trip made between two areas. Most
58 animals that migrate move when the seasons change in spring and fall.
70 They go where there is better weather and more food. Some animals
82 migrate to areas where their young will have a better chance to live.

95 There are different types of migration. Many kinds of birds migrate
106 between north and south. They live in northern areas in the spring and
119 summer. In fall, when the weather turns cold, they fly south. In spring
132 when the weather warms up, they fly north again.

141 Other animals move between a higher place and a lower one when the
154 seasons change. In summer, they make their homes high up on a mountain.
167 When winter comes, they head to warmer areas down the slopes. Birds
179 called mountain quail migrate in this way. These quail are birds that do not
193 normally fly. In the fall, they walk down the mountain and in the spring
207 they walk back up again!

212 Some mammals and tropical birds live in climates that are very wet for
225 at least part of the year. When the dry season comes, these animals move
239 to a place that is wet during this season. When the rainy season returns,
253 they go back home.

257 How do these animals know when to migrate? Scientists who have
268 studied this behavior think that animals know when seasons are about
279 to change. They also seem to know where they are going and how to
293 get there.

Name _____

Many animals migrate to and from the same places year after year. How do they know where to go? Many birds travel the same paths every year. These routes are called flyways. How do they know which path to follow? Human explorers have studied astronomy, and have used the sun, moon, and stars to guide them. Birds and other animals also use the stars and the sun to help them find their way. Some even use geographic features, such as rivers and mountain ranges, as landmarks. Biologists say some animals also seem to have the help of a built-in sense of direction.

Many types of birds, such as Canada geese, migrate each year.

Arctic terns are sea birds that fly huge distances. They can fly 22,000 miles in a year. That's farther than any other bird. Many terns live part of the year on the East Coast of North America and on islands in the Arctic Ocean. That is where they have their young. In late August, the terns begin their journey to Antarctica. They return to North America around the middle of June.

The monarch butterfly migrates up to 2,000 miles. They leave each fall to go to a warmer climate. In the fall, monarchs from Canada and the northeastern United States fly to a warmer climate in the mountains of central Mexico. Some from western North America seek warmer weather on the California coast.

Some fish migrate to reproduce. Salmon are known for making a hard journey to lay their eggs. Most salmon live in the ocean, but they are born in freshwater lakes and streams. To have their young, salmon travel back to the lakes and streams where they were born.

People have studied how animals migrate for hundreds of years. One famous migration is that of the swallows of Mission San Juan Capistrano in California. A popular song celebrated their annual return. Many of the swallows have now abandoned the Mission for other places in the area. But they haven't stopped migrating.

Name _____

A. Reread the passage and answer the questions.

1. What are two key details in the third paragraph?

2. How are these details connected?

3. What is the main idea in the third paragraph?

B. Work with a partner. Read the passage aloud. Pay attention to rate and accuracy. Stop after one minute. Fill out the chart.

Ranger in Time Chapters 5-7

Directions: After Reading Ranger in Time Chapters 5-7, answer questions in complete sentences with any explanations, referring to the text, or adding to expand the answer. Each answer should be at least 2-3 sentences (or more). Answer on separate sheet of paper. Make sure your answer can stand alone with enough of the information, without the question.

- 1- Isaac was ill; describe his recovery and how he found the soldiers.
- 2- Why is Isaac chosen as a spy?
- 3- How will Isaac enter the Hessian camp to gain knowledge of the troops?
- 4- Why is this a difficult decision for Isaac to make?
- 5- What dangers did Isaac befall in the river on his way to the Hessian camp?
- 6- How did Ranger help Isaac?

Name _____

Day 1

$$9 \div \frac{1}{5} =$$

Write six and seven hundred one-thousandths in standard form.

Plot the following coordinates on the coordinate plane. Then, connect the points. What polygon have you created?

$$968 \times 97 =$$

Day 2

Write <, >, or = to make the statement true.

$$10.365 \bigcirc 103.5$$

$$2.863 - 2.304 =$$

(3,5)

(5,8)

(7,5)

(5,2)

$$4.301 + 6.121 =$$

Day 3

Using the coordinate grid, which ordered pair represents the location of Ruby's house?

(_____, _____)

Explain a possible path from Ruby's house to the school.

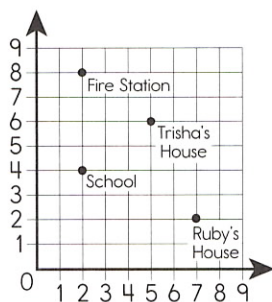

Find the area of the rectangle below.

$$\frac{3}{6} \times 90 =$$

$$486 \times 86 =$$

Day 4

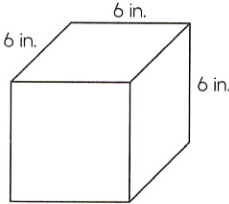

$$720 \div 10^3 =$$

Round 11.83 to the nearest whole number.

Find the volume of the cube.

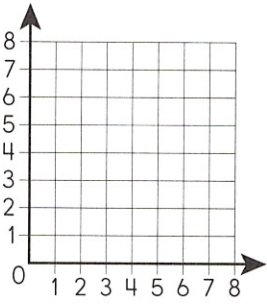

1. Find the volume of the cube.

2. Plot the following coordinates on the coordinate plane. Then, connect the points. What polygon have you created?

(3,1) (3,8)
(7,8) (7,1)

3. $4.232 - 1.963 =$

4. $226 \times 22 =$

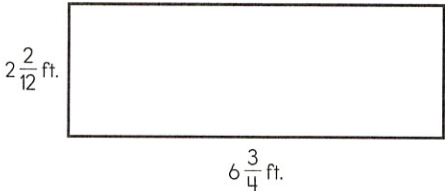

5. Write $<$, $>$, or $=$ to make the statement true.

13.33 1.333

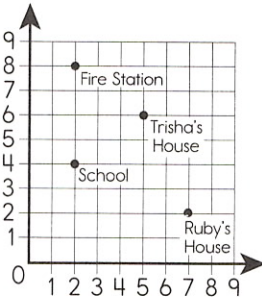

6. $4 \div \frac{1}{9} =$

7. Round 35.26 to the nearest whole number.

8. Find the area of the rectangle below.

9. Using the coordinate grid, which ordered pair represents the location of the fire station? (_____, _____)

10. $\frac{2}{8} \times 40 =$

Write a summary of a story:

What is the title of the story? Author?

Who are the characters? What is the theme of the story and how do the characters get us through the story?

Conflict and resolution? (Plot)

Here's a good way to start:

In the story, " _____ " by _____, the central theme is _____.

(Ex.) In the story of "Charlotte's Web" by E.B. White, the central theme is friendship. Fern is a little girl who adopts a runt of a pig. She names the pig Wilbur. Wilbur eventually goes to the farm.

While at the farm, Wilbur is bullied by the other farm animals. Wilbur becomes upset and lonely. One day, he comes across an unusual friend, a spider named Charlotte. Throughout their friendship, Charlotte tries to save Wilbur's life through unusual messages she spins in her web.

Eventually, the messages save Wilbur's life, but a strong friendship developed during this time. The friendship continued,

even after Charlotte dies. Wilbur lived on and told stories of their friendship to Charlotte's children and grandchildren.

now it your turn, Write a summary of a story you read.

Student Evaluation of Summary writing

Name: _____

Date: _____

Title of writing: _____

	Yes	No
<p>Introduction:</p> <p>I began my writing with a hook and introduction.</p> <p>I stated the Theme of the story</p> <p>I included the <u>Title of the book</u> and author (s)</p>		
<p>Theme:</p> <p>The story has a theme. (state the theme: _____)</p>		
<p>Setting:</p> <p>I told WHEN the story takes place.</p> <p>I told WHERE the story takes place.</p>		
<p>Characters:</p> <p>I introduced the main character.</p> <p>I told about the other characters.</p>		
<p>Problem:</p> <p>I stated a problem or goal of the story.</p>		
<p>Events:</p> <p>I told about _____ details to the theme.</p> <p>Each detail had more than 3 sentences to tell about the beginning, middle, and end of the detail.</p>		
<p>Solution:</p> <p>I told how the problem was solved or the goal was met.</p>		
<p>Conclusion:</p> <p>I have a conclusion that restated the introduction of theme, but in different words.</p>		
<p>When I summarized on my own, I included: _____</p> <p>_____</p> <p>The next time I summarize, I need to remember to include the following: _____</p>		

Writing Rubric / Narrative

Grade Level: 5

[] name _____

Content	1	2	3	4	Feedback
Create a hook, opening, that clearly introduces situation, narrator, and characters					
Sequence of at least 3 events, including descriptions using sensory details.					
Use dialog correctly that moves the story along.	overu se	misus e	adequ ate	dynam ic	
Closing sentence - Concludes the sequence of events in a reasonable way					
Conventions	1	2	3	4	Feedback
Start each sentence with a capital letter					
Use proper punctuation; periods, commas, other punctuation marks					
Uses commas when using a prepositional phrases and transitional words					
Indent and use proper paragraph format					
Spell grade level appropriate words correctly, using reference as needed.					

1 = Missing; 2 = Not Yet; 3 =nearly there; 4=Got it!

Update: 3/2020

LYRICS

Presidents of the USA

NUMBEROCK

Verses:

George Washington, John Adams, Thomas Jefferson,
James Madison, James Monroe, John Quincy Adams,
Andrew Jackson, Martin Van Buren, William Harrison, John Tyler,
James Polk, Zachary Taylor, Millard Fillmore,

Franklin Pierce, James Buchanan, Abraham Lincoln,
Andrew Johnson, Ulysses S. Grant,

Rutherford B. Hayes, James Garfield, Chester Arthur,
Grover Cleveland, Benjamin Harrison,

Grover Cleveland (again), William McKinley,
Theodore Roosevelt, William Taft,
Woodrow Wilson, Warren Harding, Calvin Coolidge, Herbert Hoover,
Franklin Delano Roosevelt, Harry Truman,

Dwight Eisenhower, John F. Kennedy, Lyndon Johnson,
Richard Nixon, Gerald Ford, Jimmy Carter,

Ronald Reagan, George H Bush, Bill Clinton,
George W. Bush, Barack Obama, Donald Trump

Chorus: These are the Presidents of the USA from George Washington until today.

Outro:

Hello there! This is Uncle Sam,
and I'm here to tell you that whether your hair's blonde, black, blue, or gray...
one day you'll have your own say.
on or after your 18th birthday
you'll be able to cast the vote which just might sway
who will be the next President of the USA.
And who knows?! Maybe someday you'll become one.
Because any natural born citizen over thirty-five can run.
