*Bunting, Books, and
Bright Ideas*

Thanks for your purchase!
Print in color or black and white.
Have students work in groups.
Lay out the cards in a 4 x 6 array.

Students take turns flipping cards and trying to match main idea statements with details cards.

Want an extra challenge? Have students play it like "Go Fish"! Shuffle and deal four cards to each player. Place the rest in the center. Students will need to read their "bone" cards and ask for the main idea... or read the "dog" cards and ask for the details to prove it!

Use it for independent work at a center with the recording sheet on page III

Legal Biz

I made this. Please do NOT post or share anywhere online! Thanks for respecting my work.

Bees have many different jobs to do.

The queen bee lays eggs. Workers tend to the larvae. Drones mate with the queen.

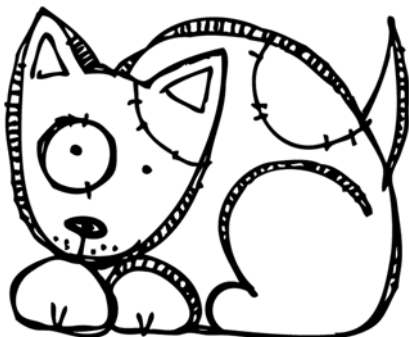

Matter is anything that has mass and takes up space.

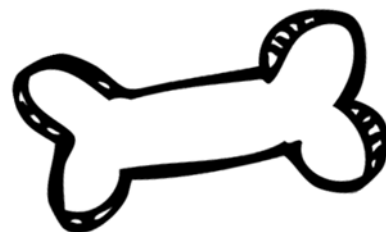

Solids, liquids, and gases are three forms of matter.

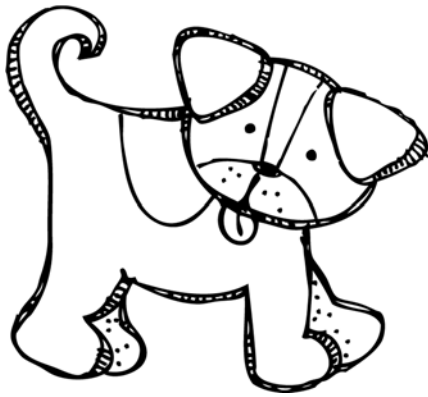

Animals need special adaptations to survive in the desert.

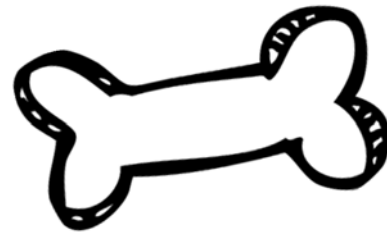

A camel's long eyelashes help protect its eyes from the sand.

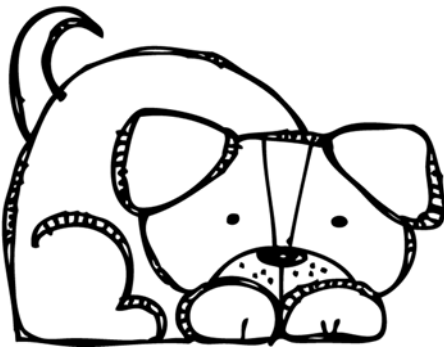

Every community has special helpers.

Police officers and fire fighters keep people safe.

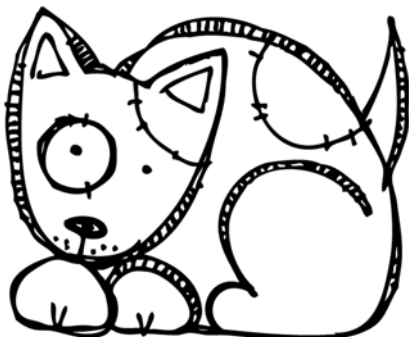

Every state in the United States has special symbols.

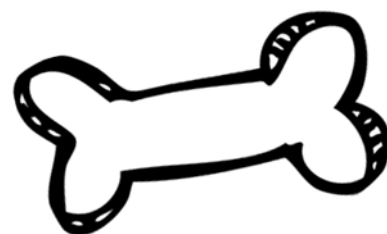

Michigan's state mammal is the White Tailed Deer.

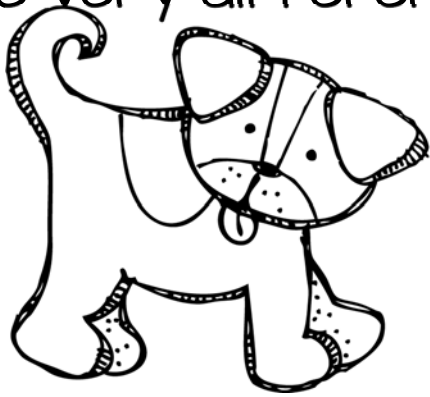

Red, yellow, and blue are called primary colors and every color can be made by mixing them.

Orange, for example, is made by mixing red and yellow together.

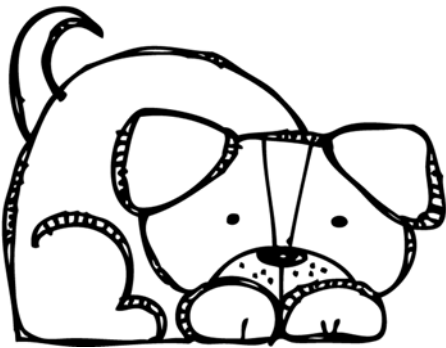

Frogs and toads may look similar, but they are very different.

Toads have rough, dry skin while frogs have moist, smooth skin.

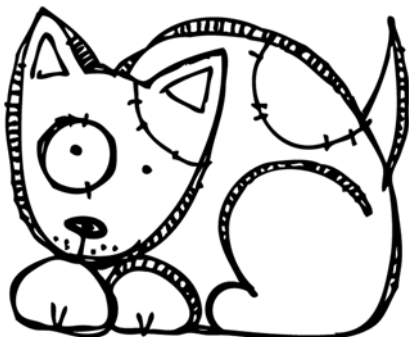

Seahorse fathers have an important job to do.

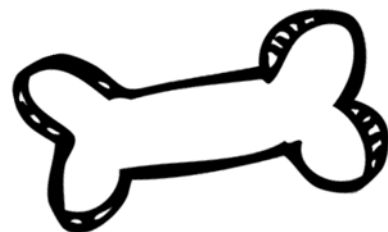

They carry their babies in a pouch, just like a kangaroo mom!

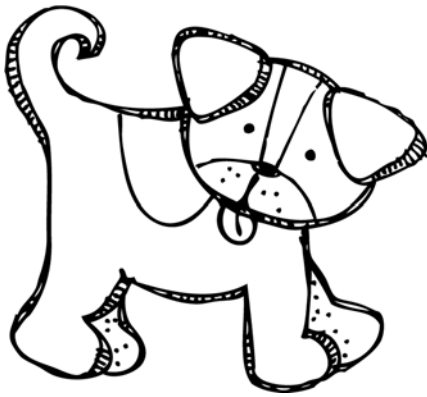

The sun controls the movement of water on earth.

When the sun heats up water, it evaporates and rises. When it cools, it forms clouds.

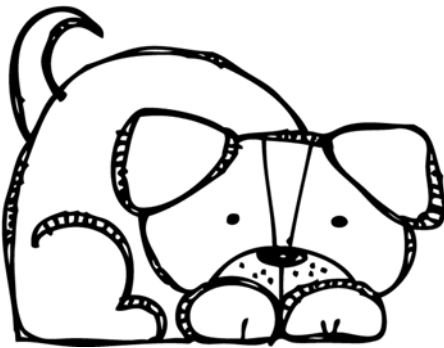

The human heart is a powerful muscle.

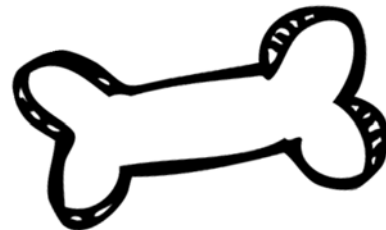

Every time it pumps, it delivers oxygen and nutrients through the body.

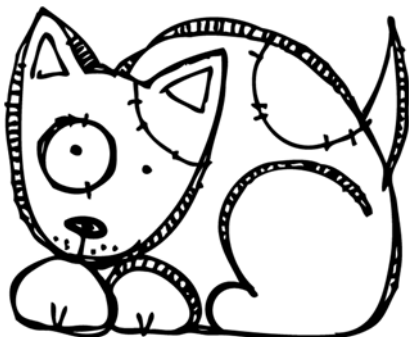

There are eight planets in our solar system.

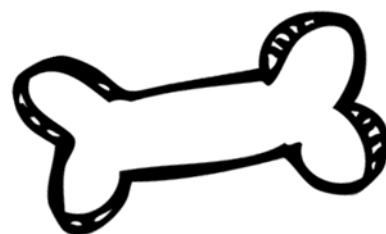

The planets are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune.

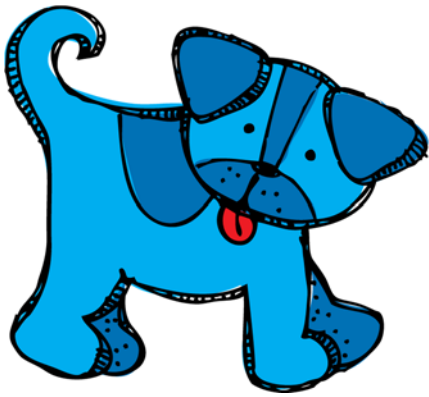

Bears have a diet of many different foods.

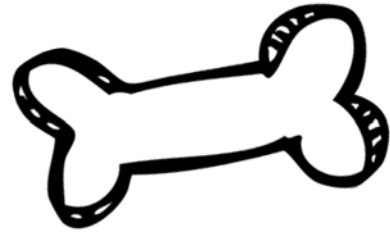

Bears eat nuts and berries. They are also excellent at fishing for their dinner.

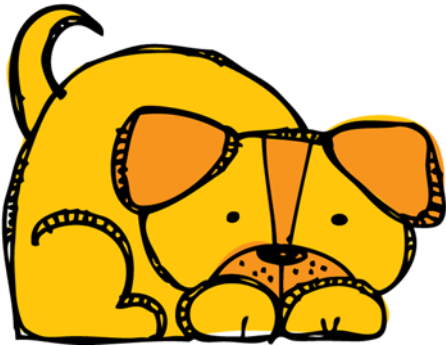

Bees have many different jobs to do.

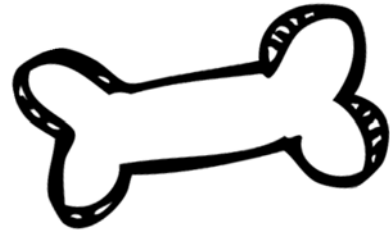

The queen bee lays eggs. Workers tend to the larvae. Drones mate with the queen.

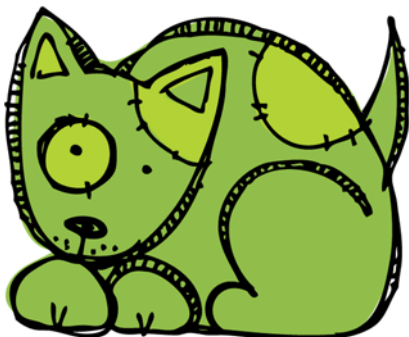

Matter is anything that has mass and takes up space.

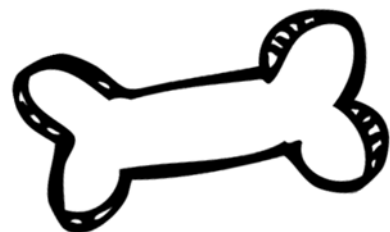

Solids, liquids, and gases are three forms of matter.

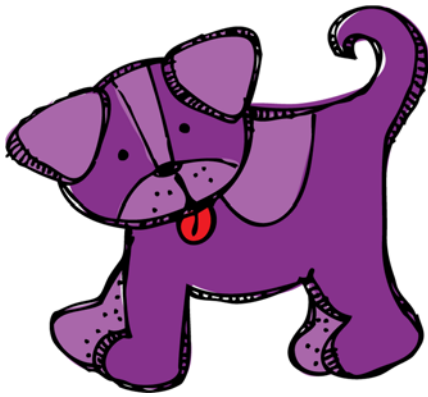

Animals need special adaptations to survive in the desert.
