Elementary Classroom Teacher
1.0 FTE

JOB DESCRIPTION: The Albert Bridge School is a small, rural, K-6th grade elementary school located in Brownsville, Vermont. The school is located at the base of Mount Ascutney, and the school and community are committed to place-based and outdoor learning. Our school works together as a learning community, and collaboration with colleagues, community organizations, and individuals is an essential component to our success.

Our curriculum is grounded in best practices in multi-age and universal design for learning to support our students. We would like to welcome a new staff member that is enthusiastic about teaching elementary students, is committed to our values of place-based, outdoor education, and is a skilled teacher that is excited to collaborate, and learn from others.

Qualifications:

Vermont State certification in teaching in elementary education.
B.A/B.S degree in teaching from an accredited institution or related field teaching

Position Responsibilities

- Leads in the classroom by taking responsibility for all students' learning.
- Provides an environment in which each child has a positive, nurturing relationship with caring adults by encouraging a climate that is inviting, respectful, supportive, inclusive, and flexible.
- Treats students as individuals by maintaining high expectations for all students; and by appreciating differences and valuing contributions.
- Works collaboratively with the families and significant adults in the lives of their students by improving communication and collaboration between the school and the home and community.
- Knows the ways in which learning takes place and the appropriate levels of intellectual, physical, social, and emotional development of students.
- Plans instruction appropriate for students by collaborating with colleagues
- Integrates and utilizes technology in instruction by knowing when and how to use technology to maximize student learning.
- Helps students develop critical thinking and complex problem-solving skills by encouraging students to ask questions, think creatively, and be curious
- Uses a variety of methods to assess what each student has learned by using multiple indicators to evaluate student progress.
- Creates an active and engaging learning environment where students are inspired to obtain a deeper knowledge of the subjects they're studying.

Knowledge Skills and Ability Required (or willingness to learn):

- Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.
- Knowledge of Trauma-informed instruction preferred
- Knowledge of Responsive Classroom and Collaborative Problem Solving preferred
- Experience in Project Based Learning preferred
