

Kindergarten Parent Connection

We continued our partnership with Renton Park teachers this week for our literacy lessons. We hope your students are gaining some independence with their learning through watching those videos. We provide several activities for each day in order to meet the various needs of families, but if you are feeling overwhelmed with what is provided, try having your student focus on just one subject a day. We understand the difficulty of managing your home lives, working from home, and needing to be the educational support for your students. Teachers will continue to contact you weekly through phone calls, emails, or class sites like Seesaw and Dojo. A quick response back from you lets us know messages are getting through. We are here to help!

Daily Routines

We encourage you to read each day and work on Dreambox 3 times a week, but if your daily routine needs to be focused on just one subject area a day that is fine. Try to get all subject areas (Reading, Writing, Math, Science, Social Studies) covered at least once through the week.

Literacy

Monday 4/27- The Super Readers chart & Using Word Parts in Reading
Tuesday 4/28- Checking First Letter of Tricky Words & Choosing What to Write
Wednesday 4/29- Writing: Think about People, Places, and Things & Using Word Parts in Writing

Hello Kindergarteners!

This week in Reading you will be practicing your Super Powers! In Writing, you will plan out your writing project. In Phonics you will keep practicing your word part power in reading and writing. In Math you will practice counting to 100, will count another collection, build some 2D shapes with household items and complete a math scavenger hunt. In Science you will learn about habitats for humans and animals and learn about what is needed to make a perfect habitat. In Social Studies you will think about our city and the various places within it. You will also practice managing frustration with Second Step.

Remember to use all of your reading super powers!
