

Fluency Activities

The Brockton Public Schools Elementary Math Department is constantly looking to support students, families and teachers by providing current, relevant and engaging resources. Before we left school in March, students in all grades have been busy learning math facts through a variety of strategies. Research has shown that memorization of facts alone does not equate to fluency and often does not result in long-term retention of facts. To continue practicing these strategies at home, math coaches compiled resources including videos* to explain the math strategy and games for students to play at home to practice their facts. We hope to continue to add resources to these folders, so please check back often.

Stay safe and have fun playing math games at home!
