

Spring Changes

Springtime brings change to land. Ice splits. It makes lakes throb with fresh water. Striped fish thrash and splash. They jump and plop with a “splat!”

Plants spring up around the lake. They thrive in the sun. A spruce with big branches stretches up and up.

Rabbits with black splotches snack on plants. They thrive, too.

But then, a fox ready to strike! It chases the rabbits. The rabbits sprint with big strides.

They hid in a thick shrub. They get away with no scratches.

It is a thrill to gaze at. Springtime is splendid.
