

## **CHEMISTRY II HONORS - 2003360**

Grade 10-12, Credit 1.0

**Prerequisite: Chemistry honors or prior approval by the acting Department Chair**

This course explores topics from chemistry honors more in-depth. Additional topics like oxidation-reduction, nuclear chemistry, and organic chemistry are also covered. An additional chemistry focus area topic will be taught in this course. The course is taught through lecture/discussion, classroom activities, and projects, as well as laboratory and research experiences.
