

# Staying Safe

The Coronavirus is very contagious.  
This means it can spread between  
people very easily.

Just like any other cold or flu  
Coronavirus will go away in a couple  
of months.

I can help stop the spread of germs  
by washing my hands with soap and  
water.

I can take my time when I wash my hands, making sure I wash between my fingers and all over my hands

My \_\_\_\_\_ is showing signs of the Coronavirus. The Doctor has told them to self-isolate for 14 days. This will help stop the spread of the virus to other people. It will help him get better

This means they cannot meet other people outside the house.

\_\_\_\_\_ wants to keep me safe too.  
They are doing this by not being very  
close to me. This is ok. They still love  
me. \_\_\_\_ wants to keep me healthy.

I can help by listening to what he is  
telling me.

Dad will use the no symbol to let me  
know if I can or cannot go into the

room. If the symbol is not on the door I can go into the room, but if dad puts the symbol on the door I cannot go into the room.

This is to keep me safe and healthy

They will need more space. I can do this by not sitting beside them

I should try not to hug / kiss them. Instead I can wave.

This will not last forever and I will be able to hug and kiss them again soon.

While they are away, I can help by keeping busy.

While they are away, I can help by keeping busy.

I can.....

Do my schoolwork

Watch TV

Play my PlayStation/Xbox

Play with my toys

We will use a calendar to help me see how long this will last

Once they are allowed out of self-isolation, we can do the things we use to do together.

#138404295

They will be so happy that I listened to them to help keep myself safe.
