

How to Setup a Desktop with Internet Access

Step 1: Look at the back of the Desktop

You'll need a **Power Cable**, a **Display port cable**, a **USB mouse and keyboard**, and an **Ethernet cable**

Step 2: Plug in **Power Cable** into the back of the Desktop

Step 3: Plug in **Display Cable** into the back of the Desktop

Step 4: Plug in **USB mouse and Keyboard**

Step 5: Plug in **Ethernet cable** into the back of the Desktop

Step 6: These Desktops **do not** have wireless capabilities so the other end of the ethernet cable will need to be plugged into a modem or router at home.
