

# CENTER FOR ACADEMIC ACHIEVEMENT

Bringing Learning and the Community Together

## SIGNATURE PROGRAMS

The primary function of the Center is to house the district's Signature Programs, which serve students from all district high schools. More than half the building is used for this function.

In these programs, students learn by working on a specific problem, project, or complex challenge and are able to train for college and careers in the following areas:

- **Animation and Game Design.**
- **Biotechnology.**
- **Culinary Arts and Hospitality at the Broadmoor Bistro.**
- **Engineering.**
- **Medical Health Science.**

## SOME OF THE FEATURES OF THE LEARNING SPACES AT THE CENTER ARE:

- A true-to-life hospital environment for Medical Health Science students.
- A science laboratory.
- A student-run restaurant for Culinary Arts students, along with an urban farm that supplies the restaurant.
- Design labs for student engineers and animators.

The Center for Academic Achievement is a hybrid building that serves students in the district's Signature Programs, while providing meeting and training spaces and housing the district's administrative offices.

## BUILDING FEATURES:

Provides more educational opportunities to students through Signature Programs.

Reduces the number of administrative buildings from four to one, and administrative square footage from 400,000 sq/ft to 131,000 sq/ft. This allowed for multiple administrative spaces to be transitioned into buildings that serve students.

Creates a central location for administrative offices (in a 72-square mile district).

Encourages the health and wellness of the staff and community through a staff fitness center, clinic, and outdoor walking paths.

Provides meeting and professional development spaces for educators and the community.
