

Hello 4th Grade families,

This week we have new activities for you to take part in. We have enjoyed having your previous week's activities coming back to us and having us respond to your work.

Reading: This week you are going to work on **Building Your Good Reading Habits**.

Writing: This week you are going to write an opinion essay on
“Should Chocolate milk be in schools?”

Math: Ahoy mathematicians! There are no pirates this week but there is Pizza! And there is Mother’s Day Math! This week you will get the chance to help plan for a pizza party. You will also try to solve how many grapefruits it will take to fill a glass with grapefruit juice. And you will calculate and compare fractions in our daily story problems. Also, there are new online math resources to learn so you can practice comparing fractions. Give them a try and if you struggle, contact your teacher for support. Enjoy the fractions, the story problems, and party planning. **CHALLENGE:** Create a meal party or a garden this week. Together with your family you can plan the menu, decide the location for your meal, figure out how much food to prepare, and even create a theme for your meal party (did someone say Pirate Breakfast Party?). Or you can choose how to create a garden where you live just like the friends in our daily story problems. Be creative and have fun. Send us a photo of your creative intelligence!

Science: This week in Science you will be working at Google as a cartographer. You will go on to Google my maps and learn how to create your own map. The rest of the week will focus in on rivers and how they erode the landscape away. Finally, you will have a chance to understand how Dams work and hypothesize which Dam would be better suited for building.
