

Exporting a Pages File as Word Format from the Mac with Pages App

Here's how you can save a Pages file as a Word document from Mac Pages:

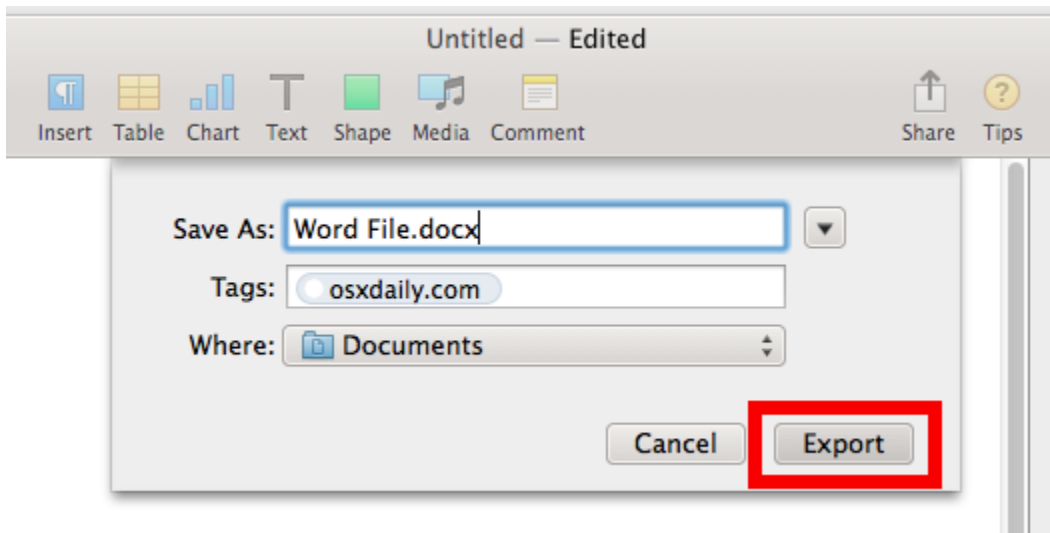

1. Open the Pages file you want to convert / save to Word format into the Pages app for Mac OS X
2. Go to the "File" menu and choose "Export To", then select "Word" or "PDF" from the submenu list

3. At the "Export Your Document" screen and under the 'Word' tab, click the triangle next to 'Advanced Options'

4. Select the appropriate Word file format to use: “.docx” for compatibility with the newest versions of Microsoft Office and Word, or “.doc” for greater compatibility with older versions of Word – then click “Next”
5. Give the new Word file a name as usual, select a destination to save the file to, and choose “Export”

Your newly created Word file, either in .doc or .docx format, will be saved wherever you specified.
