STONYHURST

Academic Year 2019 – 20

RISK ASSESSMENT POLICY

Name of Policy:	Cross Campus Risk Assessment Policy
Date of Policy Revision:	Autumn 2020
Revised by:	Health, Safety and Security Manager
Approval Body:	Cross Campus Health and Safety Committee
Date Approved:	June 2019
Date of next revision and by whom	May 2020 Health, Safety and Security Manager
Location(s) where Policy can be found	<ul style="list-style-type: none"><input type="checkbox"/> ISI Portal<input type="checkbox"/> Stonyhurst Website<input type="checkbox"/> Intranet<input type="checkbox"/> Hard copies in the following rooms:<ul style="list-style-type: none">❖ Compliance & Legal Support❖ Headmaster's PA❖ SMH Headmaster's PA❖ Bursar's PA

LDS

RESPONSIBILITY

The Governors have overall responsibility for the risk management policies of the College and St Mary's Hall. In practice, however, day to day responsibility for ensuring risk management lies with the Bursar and the Headmasters. This responsibility is in turn delegated to Senior Management, Heads of Department and Pastoral Heads, who are best placed to assess risk accurately and effectively.

WHAT IS A RISK ASSESSMENT?

A Risk Assessment is a tool for conducting a formal examination of the potential harm or hazard to people (or to an organisation) which could result from a particular activity or situation.

- A hazard is something with the potential to cause harm
- A risk is an evaluation of the probability (or likelihood) of the hazard occurring and its estimated severity
- A Risk Assessment is the resulting assessment of the probability and severity of the outcome (e.g. loss of life; destruction of property)
- Risk control measures are the measures and procedures which are put in place in order to minimise the consequences of unfettered risk (e.g. training, procedures, preliminary visits, warning signs)

A TWO-PART POLICY

This policy consists of two parts. Part One deals with Risk Assessment relating to educational activities. Part Two deals with Risk Assessment relating to the fabric and structure of the premises; building and maintenance, and activities conducted by Stonyhurst works and administrative staff.

Part One

Risk Assessment of Educational Activities

Examples of educational activities and areas of school life which require risk assessment include:

- Science experiments
- Design and Technology
- Sport and P.E.
- Duke of Edinburgh Award
- Art
- CCF
- Teaching and pastoral areas
- Trips and Visits
- Theatre and Drama
- Management of visitors on school premises
- Activities of new members of staff working under supervision whilst awaiting DBS clearance

Risk Assessments must be carried out by whichever member of staff is best placed to assess risk effectively, and should consider the following:

1. What could go wrong?
2. Who might be harmed?
3. How likely is it to go wrong?
4. How serious would it be if it did?

5. What can we do to reduce the likelihood of this happening?
6. How will we check that our plans are working?

See also:

- Safeguarding Policy
- Anti-Bullying Policy
- Recruitment, Selection and Disclosure Policy
- Health & Safety Policy
- Procedure for Educational Trips and Visits

When should a standing Risk Assessment be reviewed?

- When a new risk is identified
- When there are changes to the activity
- After a near miss or accident
- When there are changes to the type (e.g. age) of pupils involved
- When there are changes in legislation or good practice
- Annually (if none of the above apply)

What form should a Risk Assessment take?

Some departments or specialisms may use their own form, which will be best suited to the specific activities and risks being assessed. For most activities, however, Stonyhurst uses the following generic Risk Assessment Form:

Training

All relevant staff receive training in completing a risk assessment.

Part Two

Risk Assessment relating to the fabric and structure of the premises; building and Maintenance, activities conducted by Stonyhurst works and administrative staff.

The following is extracted directly from the Stonyhurst Health and Safety Policy, HSP 39: Risk Assessment.

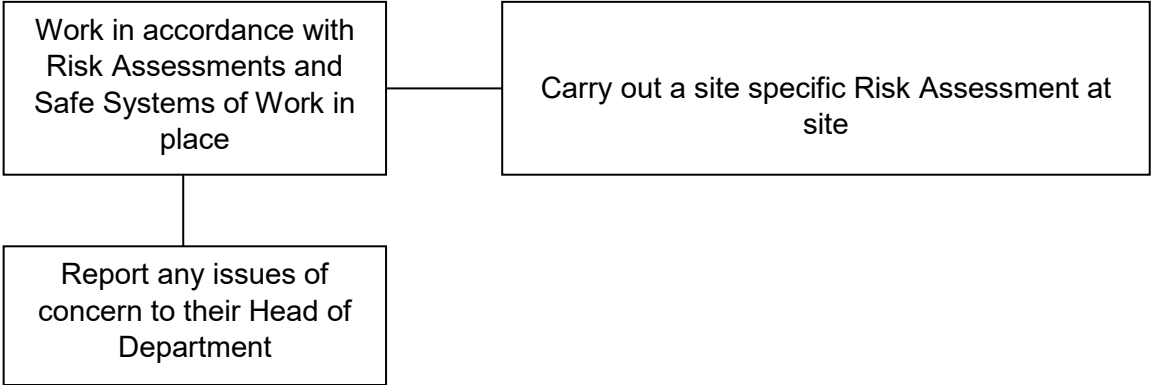

Aim

The aim of this procedure is to ensure that all Stonyhurst College and St Mary's Hall work tasks are identified and assessed to determine the measures required to eliminate or reduce and control identified hazards and risks.

THE CHAIRMAN OF HEALTH AND SAFETY ASSISTED BY THE BURSAR AND HEALTH, SAFETY AND SECURITY MANAGER MUST:

EMPLOYEES MUST:

**APPENDIX B
RISK ASSESSMENT FORM**

Risk Assessment Form

Action 1: Assess the potential likelihood of risk occurring and its potential severity.

Action 2: Measures to Prevent, Protect and / or Manage the risk.

<u>LIKELIHOOD OF OCCURANCE</u>		RISK = Likelihood x Severity			<u>POTENTIAL SEVERITY</u>
1: Highly unlikely to ever occur 2: May occur but very rarely 3: Does occur but only rarely 4: Occurs from time to time 5: Likely to occur often					1: Slight inconvenience 2: Minor injury requiring first aid 3: Medical attention required 4: Major injury leading to hospitalization 5: Fatality or serious injury
Project / Area / Location being assessed	Hazard	Likelihood of occurrence (1-5)	Potential Severity (1-5)	RISK High = > 10 Medium = 5 - 9 Low = < 5	DESCRIPTION of ASSOCIATED DANGERS INHERENT IN THE RISK/S

Can the risk/s be eliminated?	YES	NO
Can the risk/s be reduced?	YES	NO
Where and / or when are the risks likely to arise?		
Who / which groups are likely to be affected?		

Measures to Prevent, Protect and / or Manage the Risk.					
Project / Area / Location being assessed	Hazard	Action to reduce the risk	Likelihood of occurrence (1-5)	Potential Severity (1-5)	RISK High = > 10 Medium = 5 - 9 Low = < 5
