

Kindergarten Parent Connection

This week we are trying something new with how you will access the learning activities. We have posted all the activities for each day and in each subject area in one continuous document. We have also posted all the documents for the week on our new google site. As always, please give your teacher feedback about how lessons are formatted and what we can do to make things easier for you to use.

Remember that teachers are required to submit "attendance" on Fridays. We will continue to contact you weekly through phone calls, emails, or class sites like Seesaw and Dojo. A quick response back from you lets us know messages are getting through and will count as engagement. You can also show engagement by attending the weekly class meeting or by using one of the online tools for reading or math.

Literacy

Monday 5/18- Reading- Take a sneak peek
Phonics- vowel shield in reading
Tuesday 5/19- Reading- Retell and find favorite parts, Writing- "When You're Done" chart

Hello Kindergarteners!

This week in Reading you will be predicting, retelling and talking about characters. In Writing, you will add more to your writing and fix it up. In Phonics you will use your vowel shield to help you with reading and writing. In Math you will practice counting to 100, will count another collection, practice finding ten and more and solve subtraction story problems. In Science you will learn more about salmon. In Social Studies you will talk about wants and needs and in Second Step, you will practice what to do when you have to wait.

Remember to think about and retell your reading!
