

Hello 4th Grade families,

We hope you had a great week last week with the new activities in Reading. This week math will be a bit different in the sense that you will see multiple familiar faces in the math videos. As always reach out to any of us for help.

Reading: This week you are going to work on writing a summary. Enjoy the videos we put together to help you write a summer for fiction text and a nonfiction text.

Writing: This week you are going to go through the writing process to create a personal narrative about a problem or goal you accomplished over the past few weeks you have been learning at home. Remember to make it a short, interesting and exciting story.

Math: This week we invited some special guests to create a few story problems for you to practice your mathematics each day. Your teachers also got into the spirit and created a few story problems, too. Have fun this week being an artist, a laundry mat, a runner, a farmer, and a chicken master. Our 3 Act Task will have you wondering, “why are they eating so much of that?!” and asking yourself, “would I be able to eat that much?”. There are some coloring pages for you animal lovers out there and who knows, maybe discovering an animal in your coloring page will inspire you to go find the animals and insects that live nearby you! Have fun building upon your creative intelligence this week. What type of music do you like to listen to while you study?

Social Studies: This week we are moving away from Native American studies and we wanted to give you an insight into studying the basics of government. This week you will take part in online simulations on icivics.org. This is a website that you don't need a login or password for. It is highly engaging for you. You will also be practicing writing a bill to send to your teacher so you get firsthand experience at becoming a representative for your district. This week will be called "A crash course in 4th Grade Civics"

4th Grade Team
