Split Rooms (“A” or “B” rooms cannot be rented individually, must rent the entire “Single” room)							
Puyallup-A	791	30	18	18	24	24	15
Puyallup-B	713	30	18	18	24	30	21
Snoqualmie-A	757	30	18	18	24	30	21
Snoqualmie-B	632	30	18	18	24	24	15

Set-up Types Explained: *Please see the “Room Set-up Types” document for example diagrams*

Theater: No tables/Chairs only. Chairs in rows (10 chairs wide. Duwamish accommodates 13 wide)

Classroom: 72” wide rectangular tables set in rows facing the front of the room (projection screen). Each single room fits 3 tables wide per row. The 6th row in Nisqually can only accommodate 2 tables wide.

Pods: Tables in groups/”Pods” (two 72” rectangular tables facing each other). 6 “Pods” per room with 6 chairs per pod. Tables oriented so no attendee has their back to the front of the room.

Pods (Higher capacity): Same as the “Pods” set-up but can increase seating capacity as needed. Typically achieved by adding a seventh pod and/or adding two chairs per pod (total of 8 chairs per pod). Tables and chairs oriented so no attendee has their back to the front of the room. This set-up reduces the amount of personal space afforded each attendee.

Rectangle: 72” rectangular tables set end to end creating a rectangular form with 90-degree corners. Tables face inward with attendees sitting around the perimeter.

U-Shape: 72” rectangular tables set end to end creating a U-shape with 90-degree corners. Tables face inward with the opening to the front of the room.

Other/Custom: Capacities will vary depending on desired layout.
