

Group 1	\$407.0
Group 2	\$263.2
Group 3	\$263.2
Group 4	\$278.8
Group 5	\$441.5*

*Group 5 identified two phases (Phase 1 - \$240.2 and Phase 2 - \$201.3)

Observations:

- Except for Group 1, all totals are very close in range, when only considering Group 5's Phase 1 recommendation. Group one listed projects in priority order; did Group 1's recommendations include more than one phase?
- All five groups included rebuild Kamiakin MS
- All five groups included rebuild Alcott
 - 1 group noted Alcott should be enlarged when rebuilt
- Three groups included a Choice high school in Lake Washington Learning Community
- Group 5 provided guiding criteria
 - Prioritize project that can address large capacity shortfalls
 - Prioritize oldest facilities
 - Spread projects throughout learning communities

Questions for the committee (individually for now) to consider:

- Are there other observations/conclusions to draw?
- Should rebuilt elementary schools also be enlarged?
- Does the committee agree with Group 5's guiding criteria for project selection? Are there other criteria that should be considered?
- What would you put in your Phase 2 recommendation? (Group 5 already did this)
- Would you have a Phase 3 recommendation?
- Should bonds be phased?
 - If so, how far apart should they be?
 - How many phases?
 - Is there a dollar limit for a phase?
