Not being able to have an in-person Senior Honor's Day did not stop our intrepid leaders from traveling to each of our 37 Seniors' places of residence to personally deliver name signs, face cards, cords, awards and Senior Sentiments! This group included Registrar and Organizer Lisa Imsand, Upper School Principal J.P. Watson, CommArts Principal Chelsea Michelson, Dean of Students Taniah Jones, Director of Fine

Arts Janet Ford, Director of Marketing Emily Koehl, Art Teacher Brenda Smith and Science Teacher Vaidehi Rallapalli.

New Teacher:

Marlena Alvarado

By
Avery
Terpstra

Gina
artistically
rendered.

Marlena enjoying lunch at Marietta Square during Winter Learning 2020.

Gina
in her natural
state.

Marlena Alvarado joined the Upper School English department this year. She teaches British Literature to the 11th graders, as well as a Study Skills elective. Marlena's favorite thing about MSA is how community- oriented it is.

She grew up in Seoul, South Korea before moving to the U.S., where she graduated from Columbia University. She has a Golden doodle named **Gina**, and one daughter, **Juliana**. Before joining our community, she taught at North Cobb High School. In her free time, Marlena enjoys playing video games, reading, and doing yoga. Some fun facts about Marlena is that her favorite food is eggplant parmesan, she listens to K-Pop, and her favorite movie is a Korean one called *The Royal Tailor*. The most surprising thing to know about Marlena is that she's has never tried red meat because she's a vegetarian.

Marlena is also an incredible artist. She mostly does modern art and creates realistic pieces.

New Teacher: Ginny Berkemeier

By Matthew
Cohen

Courtesy of Ginny Berkemeier

Here is Ginny, who is a practicing yoga instructor.

Courtesy of HelloThinkster.com

Can't solve this? Ginny can help!

Ginny Berkemeier is a Communication Arts teacher who specializes in math, such as Algebra and Geometry, and other courses, such as Study Management. She reads any book that is available, and her hobbies are yoga and traveling.

While Ginny has interests for herself, she wants to give back to the world. For example, she likes to volunteer within any community. In addition, Ginny would start a scholarship for low income families if she won a billion dollar lottery. Her highlights of teaching at Mill Springs Academy is getting to know her students and being a part of the Communication Arts community.

Lastly, Ginny strives to follow the path of doing her best and considers all her moments at Mill Springs part of one large journey.

New Teacher: Michael Goodwin

First Classroom Selfie!
Halloween at MSA is
serious business: rid-
dle me why!

Michael Goodwin grew up in Kennesaw, Georgia and attended Kennesaw State University for both his Bachelor degrees. Before coming to Mill Springs, he worked at Kennesaw State doing Academic Integrity and making sure that students did not plagiarize. Now he teaches Ninth Grade Composition & Creative Writing.

Michael's favorite part of MSA is the community. He says "It's almost cliché for a smaller organization to describe itself as a family, but that's very

much what this school feels like: a large extended family". He also says that he likes how kids and faculty look out for each other and how teachers are willing adapt to kid's needs.

As a teacher, he believes "everyone can learn, that learning is a worthwhile endeavor, and that we are our best selves when we deliberately push ourselves to grow. I believe it is the job of a teacher to share knowledge, explore wisdom together, and to inspire students to want to push themselves. I believe in character, curiosity, play, and

the power of storytelling to speak the sagas of humanity from age to age"

Outside of school he likes to spend time with his wife and cats. He likes to binge Netflix, do board games and cook and watch his son play Minecraft. He says he cannot choose a favorite book, but he likes a roleplaying game known as *The Mummy*. He also likes his own books that he is currently writing. His favorite place in the world is the country side in Greece.

Upper School Substitute Teacher Julie and Michael Goodwin (and husband to Julie) out on a date night.

MSA Board Game and Card Game Advisor seen shamelessly promoting his favorite card game at Momocon 2019. Unsurprisingly, this comic-book themed game would turn out to be popular during Winter Learning with the Gaming students.

Interview with New Teacher: Gage Clark

By
Adrianna
Wright

What inspired you to become a teacher?

I was inspired to become a teacher by my five younger siblings. I love giving advice and tools for them to succeed.

What were your high school years like?

My high school years were very eventful. I performed in the choir and theater departments. I sang in shows at Disney World and Carnegie Hall.

What do you enjoy doing outside of school?

I love camping and with my wife, Taylor. I also enjoy cooking, reading, and spending time with my family.

Do you have any goals to complete in life?

My current goal is to get my Master's degree in Education. Other goals include learning American Sign Language and buying a house.

How is your life as a new Mill Springs teacher? What do you teach?

I am loving my life as a new Mill Springs teacher! Every day is a new adventure. English and History.

What is your happiest moment of being a teacher?

My happiest moments of being a teacher include any moment I can help a student. I am passionate about being in a position to influence students' decisions, behaviors, strengths, weaknesses, and imaginations.

What kind of education did you get to become a teacher?

I have a Bachelor's degree in English Literature from Kennesaw State University.

What do you and your family do as hobbies?

My wife, Taylor, and I love camping, going on trips, seeing new places, and doing puzzles.

The Winter Learning trip to Europe this year was adventurous and lively! Pictured from left: Gage Clark, Josiah Altland, Jack Holt, Mellik Johnson, and Jackson Wickley.

Gage really enjoys camping through the mountains and taking in the beauty of wilderness.

Gage reads to his nephew, to instill a love of literature.

I am Pro-Marijuana Legalization

By Daniel Garguilo

Legal Marijuana for recreational and medicinal purposes has been in the news for a while. States all over the country have or are considering legalizing marijuana for recreational purposes and medical purposes; however, many people are asking, is this a good idea?

I would say yes. To start marijuana has never been linked to an overdose death and is significantly less harmful to overall health than tobacco. Marijuana is also less addictive than alcohol and tobacco which are already legal.

A Cannabis flower

Legalizing marijuana would also create quality control so there would be no deaths or hospitalizations from laced product. Data also shows teen cannabis dependence drops when recreational marijuana is legalized.

With legal marijuana also comes the ability to get tax revenue from sales we already get \$ 9.9 billion from alcohol taxes and \$12 billion from tobacco taxes. If we legalized marijuana, we could get a similar amount of revenue from sale. Money from this

revenue could go to treat addictions to marijuana, alcohol and other drugs as well as fund roads, government services and any other area needing funding.

Legalizing Cannabis would most importantly would stop a good portion of mass incarceration about 21% of the US prison population is locked up due to marijuana charges. Because of all the benefits, marijuana legalization would be a great idea.

Protesting Marijuana Legalization

By Zach Hale

www.bostonglobe.com

It seems hazy what will happen to legalized marijuana in Connecticut.

A lot of people might believe there are many upsides to marijuana legalization, but they have to consider it might do more harm than good. It already harms teenagers, mental health patients, even people who aren't using it.

It is said marijuana might boost the economy and create tax revenues, but it could also increase costs for society and hinder the economy rather than help it. It will increase medical care and badly effect the people who are uninsured. It will even effect non-users, because not only will it increase medical

www.verywellmind.com

treatments and but also crime.

Common sense might say that crime involving marijuana might be disrupted with the legalization, but crime can actually benefit from it. It gives dealers opportunities for more crime, like trading and taking the cover of legal operations. There is even a possibility that an industry can be found to commercialize marijuana and target children.

The act of drug dealing.

Not to say that Marijuana legalization is entirely bad. Marijuana is said to be one of the less harmful drugs. It is constantly brought up that alcohol and tobacco are legal, even though they're more harmful than marijuana. And Americans should have the right to choose to use Marijuana or not, and that is the point that needs to be set across, it is up to us to use marijuana or not.

www.empireonline.com

Movies like 'Thank You For Smoking' tackle this belief and say people should be given the chose to use marijuana or not.

Americans have choices, and they deserve those choices. They need to teach there kids to grow up and how to make those choices. We can take away from any argument, examine both sides and come up with our own conclusions. That is the thing, we must acknowledge both sides. The point is, there are many downsides to marijuana legalization that we must take into account, but that doesn't mean there are no good sides to it. We humans must examine both sides, use our own free will and make our own conclusion.

The Placebo Effect: More Harm than Good?

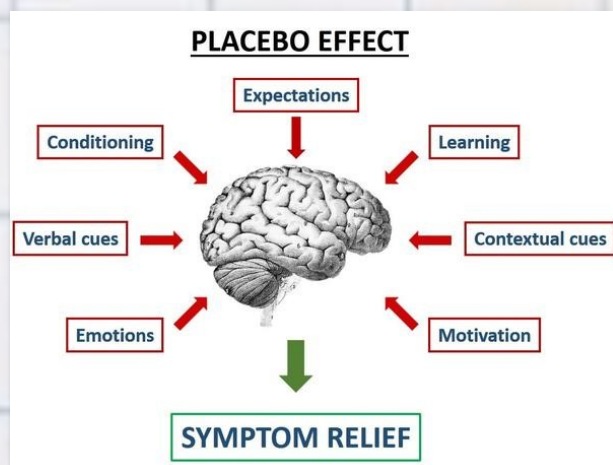

By
Avery
Terpstra

The placebo effect refers to any medicine that is thought to be real, but is actually a fake treatment. Placebos do not have any active ingredient that affects one health. Often times, placebos may be referred to as sugar pills. They do not actually do anything to heal a person; the brain just thinks that the medicine is working. Placebos can harm someone however. If a person knows they are taking a placebo, it might affect a preexisting condition they have. For example, it may affect sleep disorders,

depression, or even menopause. It may also make someone's pain worse instead of better. Why does this happen?

Many researchers believe placebos work because of the relationship between the mind and body. A person can have an expectation that the medicine will work, and then the body's chemistry will create the results the mind was looking for. This just shows that the mind is a very powerful thing and can create unreal situations throughout our body.

Symptoms felt when using a placebo

uofmhealth.org

Racism is Racism. Period.

The history of racism has gone back to beginning of human civilization, and it has continued all the way to today. However, the term racism goes back to 1902 when **Richard Henry Pratt** uttered it for the first time. The most well-known acts of institutional racism throughout history are the “White Man’s Burden” during the colonial era of the late 1800s by major European powers; the various acts of Nazi Germany and Imperial Japan during WWII and before (for Japan anyway); the slavery and Jim Crow laws of the American Southern states; Apartheid in South Africa, and various religions that put it there.

The definition of racism is prejudice, discrimination, or antagonism directed against someone of a different race, ethnicity, or nationality based on the belief that one’s own race is superior or better than other races. Now this definition seems clear from the conquering of multiple people from one powerful nation, as well as the negative interactions of one racial community against another to the horrible mocking of someone based on their race and the unfair treatments of different people.

However, it seems to have changed dramatically coming into the 21st Century. Now it seems like the definition of it is very vague as plenty of people, regardless of which race you come from, claim to be victims of racism without any proof of it and just saying to only get attention.

The definition of Reverse Racism however is preju-

dice, discrimination, or antagonism on the basis of race directed against a member of a dominant or privileged racial group. It’s also considerably known as anti-white racism due to the concept being associated with conservative social movements and the belief that social and economic gains by black people in the U.S and elsewhere cause disadvantages for white people, according to sources on the internet. But reverse racism is still technically racism simply because you have prejudice and antagonism for a certain race or races and also favoring one race over another.

The thing is, I don’t care if you are white, black, Hispanic, Asian, Latino, Indian, a man, a woman, gay, bisexual, lesbian, transgender, a Jew, a Muslim, a Christian, a Hindu, an Atheist, or whatever; you are still a human being and that’s all that matters. So why bother calling a white straight male a racist, sexist, homophobic, greedy Capitalist and Fascist pig or some other buzzword like that or just any other non-white, non-male, non-straight, and non-American person an offensive slur, you would get a lot of angry reactions on both sides, so why even bother doing that?

As **Martin Luther King Jr.** said, we “will not be judged by the color of (our) skin but by the content of (our) character.” All this means is that we should treat everyone with respect, compassion, and kindness, not by what they look like. In conclusion, there is no need for hate against any race, because the only race we have on this planet is...the human race.

By Josiah Altland

Richard Henry Pratt, the man who’s credited for uttering the word “Racism.”

A meme about Reverse Racism.

Asian-Americans trying to get into a good college be like..

Another meme about Reverse Racism, explaining that Reverse Racism is still Racism.

MSA Girls B-Ball: Down but Never Out!

By Avery Terpstra

This year's 2020 varsity girls basketball team was small but mighty. There were six players that consisted of **Luisa Gorgoll**, **Emily Suarez**, **Nadia Allen-Krincek**, and captains **Madison Taylor**, **Camille Michael**, and **Tatum Gordon**.

They were also led by the fantastic **Coach Phil Hanson**, who stated "The 2020 Varsity Girls Basketball Team was a True Gift from God and working with them was the highlight of my day." The girls had a 0-12 record and came 4th in the division, but stayed positive each practice and continued to work hard and improve their skills.

Madison Taylor said "we worked well together as a team and we tried our best."

This year had three representatives at the All-Star Game, seniors **Camille Michael** and **Tatum Gordon**; there was also junior **Madison Taylor**. At the game, **Madison** won a skills competition and **Tatum** was part of the winning team. We are proud of you girls for representing MSA.

Coach would like to give special thanks to the MSA administration, faculty, **Coach Taniah Jones**, parents and the students for their endless support.

The Lady Mustangs always play a tight game. From left: Tatum Gordon, Maddie Taylor, Coach Phil Hanson and Camille Michael. Photo Courtesy of Camille Michael

By Avery Terpstra

MSA Boys B-Ball Hits the Shots

The Boys Team contemplates their next play. From left: Ryan Rafuse, Michael Slifer, Zach Burns, Ethan Maeroff, and Taylor Mallady.

Photo Courtesy of Camille Michael & Yearbook

"The 2020 Varsity Boys Game and won a skills competition. Good job Ryan! The team ended with a 2-10 record, coming 5th in the division for the regular season. Although it wasn't the outcome they were hoping for, they fought hard and stayed motivated throughout the entire season."

The 2020 boys' basketball team consisted of **Zack Burns**, **Michael Slifer**, **Ben Parker**, **Scott Owen**, **Jacob Beck**, **Jaden Sella**, **Maclean Tadlock**, **Jeremiah Jones**, and **Ethan Maeroff**. They were led by Captains **Taylor Mallady** and **Ryan Rafuse**.

After an impressive senior year, **Ryan Rafuse** was selected to the All-Star

Coach Phil wanted to give a special thanks to special thanks to the MSA administration, faculty, **Coach Taniah Jones**, parents and the students for their endless support.

By Daniel Garguilo

MSA swimmers at AAC taking their mark.

Photo Courtesy of Josh Hersko

MSA Swimmers

Test the Waters

This past season we had approximately 25 swimmers on the team ranging from middle school to high school grades. Once again, **Head Coach Josh Hersko**, and **Assistant Coach Michael Grif-fith** led the team to a great season. We had three team captains this season: **Mason Ogryzek**, **Daniel Garguilo**, and **Jack Buckley**. It was a tremendous season from start to finish. We had a lot of new faces as well as quite a few returning veterans. The season culminated with a second place finish at the AAC Championship Meet. Coach Josh says, “we said goodbye to a trio of outstanding graduating seniors (Mason Ogryzek, Daniel Garguilo, and

Jack Buckley) who have each represented the Mustangs for many years. Their great leadership will be missed, but we know their memories will forever be a part of the great MSA swimming tradition!”

The Mustangs continued their impressive showings this year as well, getting second place at the AAC Championship, and a top ten finish at the GISA State Championship Meet.

Coaches Josh & MG were very proud of the team this year. Coach Josh’s advice always? “Always give your best, and remember to leave it ALL in the pool!”

MSA Wrestling Takes it to the Mat at State

By Zach Hale

MSA Wrestling this year was led by two coaches: **John Hanrahan** and **Thomas Berg**. The 10 wrestlers who represented Mill Springs this year: **Nicholas Clifton**, **Alexander Hill**, **Yash Kubde**, **Luke McCain**, **Ishwar Naik**, **Mason Ogryzek**, **Zachary Porter**, **Ethan Stroup**, **Daniel Tarrant**, and **Matthew White**.

The wrestlers had a great season this year. They held their wrestling extravaganza in January. They took on several different wrestling programs from other schools and all of our wrestlers fought with spirit, including the parent volunteers, Mr. McCain and Mr. Tarrant. Zach Porter, Daniel Tarrant, and Mason Ogryzek all performed greatly, and the outstanding wrestling award was a tie between Luke

McCain and Ethan Stroup.

The team won their seventh consecutive GISA Regional Championship which qualified nine of their wrestlers to be in the state tournament. Daniel Tarrant and Nick Clifton both won medals and were a great inspiration to there team. It has been an great season, and we should be proud of our Mustang wrestlers.

On this season’s team, Coach John shared, “It was a great pleasure to work with this young group of Mustang wrestlers this year. I am proud of each and every one of our athletes and can assure you their work ethic, dedication and perseverance will carry over into all aspects of life as they continue to become young men.”

From left, back row: **Coach John Hanrahan**, **Ethan Stroup**, **Daniel Tarrant**, **Matthew White**, **Nick Clifton**, **Assistant Coach Thomas Berg**, and **Zachary Porter**. Front row: **Smith Hill**, **Luke McCain**, and **Ishwar Naik**.

The Question of Covid-19: Impact and Fallout

During the Coronavirus Pandemic, we are living a new life. We are in lockdown and we must stay home or at least socially distance unless we are deemed as essential workers.

Schools, shops, restaurants, and entertainment have all been forced to shut down. Our way of life has been drastically altered and a question a lot of people have is when will America reopen.

Recently, there have been a number of protests across the country to reopen America. Many health experts have warned that these protests are a hotbed in spreading the novel coronavirus and that these may cause another wave of the virus to hit Americans.

Some have also said that it is just too soon reopen the country.

In many European countries, they have a rule where they will start to slowly open the country after 14 days of no new cases, but they will open very slowly.

There are two schools of thought when it comes to reopening the economy, we should keep it closed and make sure we are a corona-free nation or we should just open the economy and the weak and old should stay home? Many health experts have warned that this is a bad idea because of what happened in Sweden.

Sweden had the herd immunity theory and cases continue to rise and many health experts have said that this is not the right approach.

There are no easy answers to this unprecedented situation.

The Dystopia of Freedom in China

By Matthew Cohen appropriate to suppress or imprisonment, whether it be foreigners or citizens. Laws and other governmental powers have prevented the public eye from seeing the conditions and extent of Chinese prisons. Thousands of people have been sentenced by a legal system that does not value most rights, from a citizen with an undesirable heritage to Noble Prize winners.

Basic freedoms, such as freedom of press and freedom of religion, have been suppressed in all of the Chinese territories. Legal powers have been put in place to limit the personal freedoms of Chinese citizens which has caused unrest and controversy over the years. Ex-

A government building in China

anti-governmental protests have consistently been blocked by China.

All news within the borders of the country are overseen by the propaganda department. The newspapers, the television networks, and the Internet are systematically monitored and filtered. While many countries have similar maintenance of their media, most

Police patrolling a public area

Examples of citizen restrictions include the ban of independent trade unions and an absence of an individual's rights in an arrest. Any attempts pushing for rights in China have been met with governmental violence and imprisonment. Furthermore, news of

fail to reach the extent and severity of China. For example, most public online websites are either blocked or restricted, and citizens are urged to use Chinese counterparts. Most Chinese citizens' searches are tracked by the government. If the citizen violates any rule, such as using a foreign website or attempting to search controversial news, the government can pinpoint their home and workplace for an arrest. As a result of the

strict and immense reach of their online resources, China has the largest number of imprisonments of cybercrime.

This past year, China prohibited American reporters from news coverage by canceling the journalists' legal Chinese presence. This action prevents American reporters to further investigate China and forces them to leave the country. More than a dozen reporters are affected, all

from the New York Times, the Wall Street Journal, and the Washington Post. The cancellation was part of a political battle between the United States and China. Trade between the two nations have been severely affected, and there is an atmosphere of political rivalry. China's recent restrictions on American journalism was specifically in response to the United States passing a law that limited the number of Chinese journalists. While an eye for an eye is the common reaction throughout history, there is no time like now when rationality and cooperation is needed to save the future.

Chinese newspapers are heavily censored

Online use is constantly monitored
