

Dear CDS Families,

During our Distant Learning time together, your child has been using **Lexia Reading Core**, a web-based reading program that provides the targeted practice and instruction your students need to enhance their reading skills.

We are excited to offer the use of Lexia Core5 at home during Summer Break, through July 31, to continue your student's academic growth!

While the recommended usage per week varies, a good rule of thumb is to **work on Lexia 20-30 minutes per week** over the Summer Break.

I will periodically monitor your child's progress and post his/her achievement certificates when applicable and as long as SeeSaw is active.

Another program that your student has been engaged with during our Distant Learning time is IXL. This program will also be available through July 31. This is another wonderful opportunity for your child to continue with their growth that they have made over the academic school year.

**It is recommended for your child to continue to work on IXL 30 minutes in Mathematics and 30 minutes in Language Arts per week.** This can be done in coordination with the IXL BINGO board. Students can mark and then snap a pic of their board at the end of the summer to post on Seesaw.

Please email me at [harchitetto@carrollwooddayschool.org](mailto:harchitetto@carrollwooddayschool.org) with any questions, I hope that you all share in our excitement for the use of these wonderful programs over the break! Please feel free to use the chart below to help organize your summer plan if you choose to participate.

**Mrs. Architetto**

WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5
