### Pre-reading Materials:

- [November 2018 SAC Meeting Minutes](#)

### FYI Materials:

- DISH -- [District](#) and [School](#) Data Dashboards
  - Web-based resources intended to be supportive of local improvement planning and communication efforts. DISH provides district- and school-level trend data in a variety of visual formats (graphs and charts) so that users can more easily see patterns. Data tabs include demographics, state assessment, student growth, postsecondary and workforce readiness, and accountability. New this year is the addition of PSAT and PSAT-SAT growth data visualizations. If you have trouble viewing the tools in Explorer, try a different browser (e.g., Chrome, Firefox).
