**MARKET RECAP - FEBRUARY 2017:**

Equity markets continued their trek higher into record territory during February, fueled by optimism that President Trump's proposed tax reform, reduction in the regulatory burden and massive infrastructure spending package will be quickly passed into law. After first breaking through the 20,000 barrier in late January, the market made short work of the next 1,000 points, topping the 21,000 mark on the first day of March. Bond yields traded within a tight range for most of the month, but moved sharply higher on February 28th when a pair of Fed Presidents told investors that rate increases were likely to come "sooner-rather-than-later." The implied probability of a hike on March 15th, which had been below 40% just days before, quickly shot to 80% and would top 90% a few days later.

The January ISM manufacturing survey indicated the outlook of U.S. purchasing managers continues to brighten as the composite manufacturing index rose by 1.5 points to 56.0, the highest reading since November 2014. The employment index led the way, rising to a 2½-year high. By contrast, the ISM non-manufacturing index took a step back, declining to 56.5 from 57, still a solid outlook for the service sector. On the job front, nonfarm payrolls increased by +227k in January, a nice increase from the +187k average for all of 2016. The unemployment rate actually rose from 4.7% to 4.8% in January, although the increase was a result of more Americans entering the workforce rather than losing jobs. First time claims for unemployment benefits continue to fall, reaching a four-decade low in late-February, further evidence of labor market health.

It's widely recognized that U.S. consumer confidence spiked after the election, and in fact reached its highest level since 2011 in February, suggesting a renewed propensity to spend. The January retail sales figure seemed to corroborate the optimism, rising +0.4%, while December sales were revised upward from +0.6% to +1.0%. Retail sales in the fourth quarter of 2016 were the strongest in 2½ years and 2017 has gotten off to its best start since 2013. Turning to inflation data, headline CPI surged by +0.6% in January, well above the +0.3% median forecast. The biggest jump in nearly four years was due in large part to higher energy prices. Core CPI, which excludes food and energy prices, rose a lesser +0.3%. On a year-over-year basis, overall CPI is up +2.5%, the biggest advance in nearly five years, while core CPI is up +2.3%. The Fed's preferred inflation gauge, core PCE, was more sanguine with a +0.3% gain while the year-over-year rate held steady at +1.7%. While the modest reading on core PCE suggests the Fed could be patient, markets are now expecting a rate hike at the FOMC's March 15th meeting. Bond yields have moved higher with the two-year T-note trading to a post-recession high at 1.30%. But, thus far there's no sign of a major tantrum as the 10-year T-note yield has held below 2.50%. With the equity markets on solid footing, the labor market tightening, and inflation firming, the Fed has a green light to hike sooner rather than later.

**Note 1:** CMT stands for Constant Maturity Treasury. This data is published in Federal Reserve Statistical Release H.15 and represents an average of all actively traded Treasury securities having that time remaining until maturity. This is a standard industry benchmark for Treasury securities. The CMT benchmarks are moving averages. The 3-month CMT is the daily average for the previous 3 months, the 6-month CMT is the daily average for the previous 6 months, and the 1-year and 2-year CMT's are the daily averages for the previous 12-months.

**Note 2:** Benchmark data for TexPool is the monthly average yield.
