

Hello 4th Grade families,

We have three more weeks of school left! Let's keep up the positive energy and finish out the school year online with pride. This week we have provided a lot of great activities for you to take part in.

Reading: This week you are going to study Theme in fiction books and Author's Craft techniques in Non Fiction.

Writing – This week you get to choose between Narrative, Informational Essays or Opinion Writing. Enclosed is all the tools you will need. Just choose 1. Well, you can always write more if you want. 😊

Math: Get ready for baking, snacks, puzzles, and parakeets this week mathematicians. Not only will you calculate and compare decimals and fractions this week, you might also get inspired to do something creative with math. Don't forget to invite a friend or family member to join you this week because sometimes math is more fun with more brains (plus you might convince your family to do some delicious baking!). After finding out this week how many water droplets will fit onto the surface of a penny, make sure to use what you learn from the Social Studies lessons to plan how to get more than just one penny in your pocket (that you might eventually drop water onto?).

Social Studies: Hello Economists! This week for social studies we are wrapping up social studies with a piece of contemporary Washington. This week we are focusing on the business of Washington and have you research how they support the state. This is a great way for you to explore what is in your backyard and be proud of the state you live in. The slide show provided will give you information about how to successfully complete your google slide show project. Have fun!
