

Big boy shovelleeeeeeeeeee

ben nett

What is your invention or innovation?

Our innovation is a innovation of a shovel that will help you with your daily outside work. The Big Boy Shovel has a unicorn lever on the handle of the shovel. The lever on the side opens a polished smooth non splintering wooden plate which closes when you pull the lever again. The wooden plate is used to hold whatever you are shoveling and traps it in there so you don't accidently drop what you have just shoveled. There is also a attachment of a long sharpish metal plate that will go on the front of the shovel to help dig in the hard objects. The nice thing about the shovel is that it is also that very light in weight while being strong. Go to www.BigBoyShovel.htm to get your Big Boy Shovel today

Describe your product or idea

It is shovel and it is big boy. It makes big hole.

What problem does it solve?
