

Seaty featys

Leah pessin

Are your feet not touching the ground maybe your feet are even swinging and hitting the top of the tabel

Seaty featys is a creative customizable swinging footrest. The mane part that will be in every footrest is the two elastic cords that hold or clip onto a cloth peace an inflatable reast or a hard each foot plastic.

**This product is quit
important because
feet not touching the
ground can be quite
agitating**

The product would give the buyer a place to rest legs or even slity swing them and wold cost 19.99\$ for the elastic and a sipil footrest and then you cold buy add ons and more foot rests

A decorative graphic on the left side of the slide, consisting of a teal-colored triangle pointing downwards and to the right, with a white diagonal line cutting through it.

Most footrests don't
have a swinging
fetcher

You should invest in my product because let's face it we wear all shorts at some point and we all wanted a comfortable foot rest

So sharks

How wold you like a slice off
my product
