

SARAH ADAMS ELEMENTARY

CONSTRUCTION UPDATE

MAY 2020

- The geothermal well field drilling will was completed the week of May 11. The geothermal well field horizontal piping into the building was completed by the end of May.
- The old scuppers on the original portion of the building have been removed and replaced with a new lintel and cast stone header. The existing roof parapet will receive new metal scuppers in the old scuppers' place.
- Masonry tuckpointing on the exterior of the building is completed. The mason is awaiting special shape bricks to arrive to complete select existing brick replacement.
- Mechanical and Electrical rough-in has begun inside the building.
- Interior demolition of the previous mechanical system began the week of May 18.
