ADMINISTRATIVE PROCEDURE
GUIDELINES FOR AIDE TIME IN ELEMENTARY CLASSES
Code No. 605.6

Various conditions may give rise to necessity to have more than 30 students in an elementary classroom. When such a situation arises, and is deemed to be the best alternative, the administration will use the following guidelines to provide instructional aide time for the assistance of classroom teachers:

31-32 Students in Classroom equals 1 hour of instructional aide time. For each additional student, there will be an increase of one-half hour of aide time permitted. For example, 33 students equals one and one-half hours, 34 students equals two hours, etc.
