		Blood borne pathogens Allergic Reactions	<p>spotted notify your supervisor before removing trash bag.</p> <p>Utilize waste rolling bins, carts or rolling cans when collecting waste. Be aware of pinch points / crush points when moving equipment through hallways. Do not carry waste bags slung over your shoulder. This can lead to injury from unseen hazardous objects located inside the bags. Utilize proper lifting techniques when collecting waste. If waste is over 50lbs use the buddy system to collect the waste.</p> <p>Utilize site specific waste segregation when collecting waste. Examples are: food waste, biohazard, hazardous materials, construction debris and recyclables.</p> <p>Double bag all trash receptacles after emptying.</p>
