

Assistive Technology services are available for students with identified needs. An assistive technology team is available to provide a variety of services including observations, consultations, assessments and/or evaluations, teacher supports in the development of implementation strategies and identification of devices. Areas of support include: communication; vision; hearing; learning; computer access; environmental; daily living; fine and gross motor. For additional information contact the Exceptional Education Department at 816-418-8941.
