

Marble Run

Materials needed:

Empty paper towel or toilet paper tubes

Scrap paper

Scissors

Masking tape or blue painters tape (Make sure the tape will not peel paint off the wall.)

A marble, small ball, or other sphere shaped objects

Procedure:

Cut some tubes in half. Tape to a wall in a zig-zag design.

Release a marble at the top and watch it travel down the run. Did it work? Should you make adjustments to your marble run? Which sphere is the slowest? Which sphere is the fastest?
