

Directions: Excellent Expressions

- Deck of Numeral Cards
- One Recording Sheet per Student

1. Each player takes cards from the deck.

2. Arrange your cards using all your numbers to create an expression that matches any of the rules.
3. Show all steps to solving your expression on the recording sheet.
4. Check your partners work before you take a new set of cards. Continue until you have made an expression for each set of rules.
5. If you cannot use your cards to make an expression that matches a rule, choose new cards from the deck.
6. The winner is the first person to fill in all the expressions.

5.OA.1: Use parentheses, brackets, or braces in numerical expressions and evaluate expressions with these symbols.

Reminder: Expressions do not have an equal sign!

Expression: $6+8$

Equation: $6+8=14$

Name _____ Date _____
