

Directions: Target (Addition)

- One Recording Sheet per Students
- Numeral Cards

This game should be played in pairs.

1. Each pair picks

4 cards (To make two numbers to the tenths place)

6 cards (To make two numbers to the hundredths place)

8 cards (To make two numbers to the hundredths place)

2. Work together to arrange the cards to form:

numbers whose sum is close to 10

numbers whose sum is close to 10

numbers whose sum is close to 100

3. Find your score by finding the difference between your score and the target. For example: For a game with Target 1, if your difference was 0.2 you score 0.2

4. Get the lowest score to win the round!
