

SARAH ADAMS ELEMENTARY

CONSTRUCTION UPDATE

JUNE 2020

- The horizontal piping for the geothermal well field is in progress and will be complete the week of June 15. The well field lines are stubbed into the existing building.
- Window replacement of the original building's sliding windows will begin the week of June 15.
- Many HVAC lines and equipment being replaced have been demolished. New in-room heat pumps for distributing air conditioning and heat are currently being installed.
- Finishes in the library have been demolished and new openings for the Maker Space have been cut in the wall.
- The future Maker Space and teacher itinerant space has been gutted and new metal framing is in progress for new wall locations.
- In the kitchen, the floor and ceiling has been demolished to make room for new ductwork lines, ceiling, and flooring.
- Minor electrical and plumbing rough in items are in progress around the building.
