tial Commitment Order" was left behind so that Marcos can still have anyone arrested who is perceived as a threat to national security, actually his security--for all intents and purposes a state of martial law. But the name change, according to Dr. Arturo, was enough to satisfy the Reagan Administration. He added with sadness, "It is so unfortunate that the U.S. government and Mr. Reagan have teamed with Mr. Marcos."

It is exactly this kind of situation, said Dr. Arturo, that endangered the lives of over 50 American diplomats who were taken hostage at their embassy in Iran. "An average person in Iran was not anti-American," he pointed out. But the U.S. government won the contempt of the Iranians as it supported the oppressive Shah. "The time is approaching when American interests in the Philippines will be hurt if the government does not withdraw its support."

So the doctor charges the American public, and St. Louis U. High, whose students were engaged yesterday, according to Mr. Zinselmeyer, by his genuineness, with the responsibility "as human beings and as Christians, to at least work for the betterment of the rest of the world."

Civil War is his greatest fear, and the denial of US aid seems to be the only alternative. With the recent assassination of a rebel leader, the country is one step closer to that breakdown. "Things are getting worse. We are seriously considering returning home, but we could be shot, and that would set back our timetables. I don't want to get shot."

Although the problem definitely lies in the government, "it is no longer a political issue; it's not a religious issue; it's a moral issue." Thus the doctor is a man who talks very much like a prophet. He talks of messages as well: "It happens. It will happen again."
