

Heritage Handbook

Name: _____

Year 3

How it works

Welcome to your yearly Heritage Handbook. Inside you will find suggestions for a range of activities, visits and trips that you can conduct with your families to help expand your learning of each terms topic. Whilst they are not expected to be completed or undertaken they are a wonderful opportunity to help you explore your learning further and help you explore your learning further outside of the classroom.

You can record your trip through a photograph, picture, drawing or short recount and review in your homework book.

In this year 3 edition you will find a range of local and further afield activities/visits/trips.

We hope that the suggestions in this handbook are engaging and exciting and that you are able to even find a few hidden gems to help you. If you find a new activity please make a note in this handbook and share your thoughts with your teacher.

For Parents:

Please access your child's curriculum map and knowledge organiser on the school website for further information around the curriculum.

*** These trips are suggestions. All necessary precautions to be taken are the responsibility of parents/carers.**
