While differentiated instruction is a component of instruction for ALL students, it is also the linchpin of our gifted program for students who are identified in the specific academic domains. Differentiating instruction allows for adapting the content, process, or product based upon a student's readiness, learning style, or interest.

Offerings in italics are provided through the Gifted Intervention Specialist specifically for students who are identified as gifted.

***Critical Thinking is open to all students in grades 7 and 8. Descriptions of these offerings may be found in the courses of study.*

• *Honors, Advanced Placement, and CCP courses are available in several disciplines in grades 7-12 and may be appropriate for, although not limited to, students identified as gifted. Gifted identification is not a prerequisite for honors or AP courses.*
