

Pear Bites : PureAir Series

PHI Technology

PHI Technology was developed and distributed by RGF Environmental (West Palm Beach, FL).

- Combination of UV Light and Metallic Cage
- Metallic cage reacts with the UV light to create “Advanced Oxidation Technology”

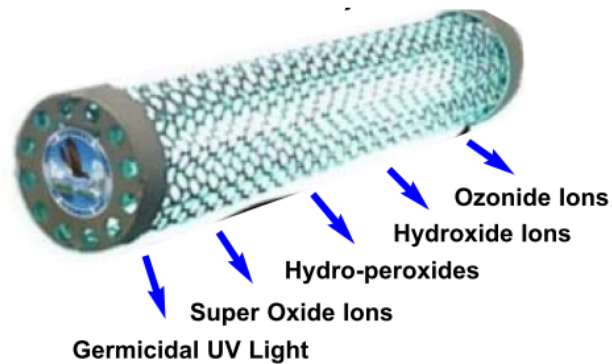

*information gathered from RGF.com and RGF support documents

PHI Technology

PHI Cell is not a filter or an ozone generator. It is a cell that radiates friendly oxidizers.

Benefit: Does not rely on UV alone to kill pathogens but can also kill pathogens in the air and on surfaces.

*information gathered from RGF.com and RGF support documents

PHI Technology

What does this all mean?
