Upper Division Device Requirements for 2020-21

All Upper Division students should have a web enabled laptop with a working camera and microphone. The two models of laptops that Denver JDS recommends are any chrome book with at least 4 GB of RAM and 1.1 GHz of processing power and any Apple Laptop (Macbook Air, Macbook Pro). The main difference is price ($250 vs. $1,000) but the chrome book is sufficient for what will be asked of Upper Division students.
