### **BADM 100** *Introduction to Business Organization*

A survey course designed to introduce the student to contemporary issues and principles of business, as well as the different business disciplines a student may be interested in pursuing as a career. These areas include management, marketing, accounting, finance, human resource management, and entrepreneurship. In addition, other topics include the global dimension of business, the various forms of business ownership, teamwork, securities, ethics and social responsibility, and economic challenges facing the 21st century.

### **SPAN 101** *Elementary Spanish*

This course provides an introduction to the Spanish language and the culture of its speakers. Fundamentals of pronunciation, structure and Hispanic culture are studied to develop the ability to use and understand basic spoken and written Spanish. Special emphasis is given to development of oral and aural skills by in classroom exercises and assignment of activities to reinforce course content on the internet.

### **PSYCH 101** *Introductory Psychology*

This course provides instruction in the nature of human behavior and consideration of theories and principles pertaining to the topics of research design and experimentation, perception, emotions and motivation, personality, social psychology, psychopathology, human development, learning, cognition and memory. It includes essential features of the biological and neurological basis of behavior.

### **PHIL 101** *Introduction to Philosophy*

Introduction to the methods and subject matter of the discipline of philosophy through critical analysis of primary texts and discussion of enduring questions regarding reality, knowledge and value. Topics include the sources and limits of knowledge; the nature of reality, mind, and personal identity; the existence of God and religious experience; moral value; philosophy of science; the nature of truth; distributive justice; and the meaning of life.

### **CHDV 100** *Child Growth and Development*

The course examines the major physical, psychosocial, and cognitive/language developmental milestones for children, both typical and atypical, from conception through adolescence. There will be an emphasis on interactions between maturational processes and environmental factors. While studying developmental theory and investigative research methodologies, students will observe children, evaluate individual differences and analyze characteristics of development at various stages.

### **RMGT 7** *Restaurant Management 7*

This course will provide the student the opportunity to achieve maximum results in the development of baking skills and knowledge. The student will learn to produce breads of many types as well as a wide variety of desserts and pastries.
