

# Mask Protocols

## What You Need to Know About Masks & Your Child in School

Make sure the mask fits snug against the face, and covers both the child's nose and mouth. The mask should include multiple layers of fabric and be secured with ties or ear loops. *Please note: Gaiters are not allowed.*

If you can see through the fabric of the mask, it is not an appropriate shield of protection for your child. Your child should be able to breathe without restriction but vents or filters are not allowed.

Your child's mask must stay on even during coughs and sneezes. After all, we are trying to keep germs from spreading!  
Masks should be washed after use.

Children should practice wearing a mask before the start of school. Make it a family affair!
