

Shutting Down your Chromebook

Avoid some typical Chromebook problems!

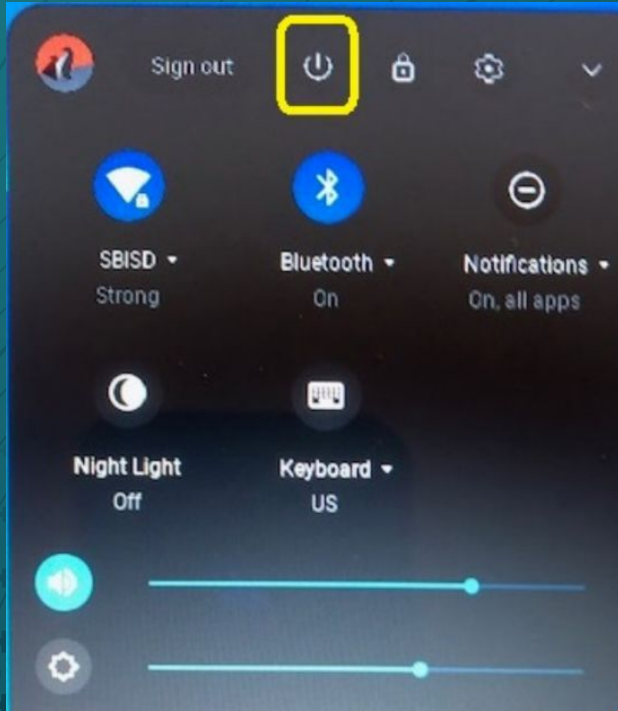

*Follow these steps EVERY TIME you close the lid
on your chromebook.*

When you're about
to close the
chromebook lid...

Click the time on the bottom right.

Click the shutdown icon.

The next step is the
MOST important!

WAIT for the light to go out!

You're chromebook
is NOT off if the
light is ON!

Now you can close the
lid on your chromebook.

Do this EVERY time!

Remember to shut down
before you charge at night!

Chromebooks need rest too. :-)
