Athletics and Co-curricular Policy

The Academy recognizes the tremendous opportunities for growth, enrichment and community-building that athletics and co-curricular activities offer our students and their families. However, providing these types of options during a pandemic presents a unique and daunting challenge. Depending on the specific activity involved, and the safety protocols recommended at the time, the Academy's offerings may involve additional screenings and may range from small group or individual skill building all the way up to public performances and full competition. The Academy is committed to providing athletic and co-curricular programming as circumstances permit and will make and communicate decisions about those offerings in a timely manner.
